## POWER PACKS AND RELAYS

The MPS Auxiliary Pack is a self-contained transformer and relay (an ON/OFF switch controlled by a circuit) designed for low-voltage 24VDC occupancy sensors.

An auxiliary pack is capable of switching a 15A, (MPSA) or 20A, (MPSHD) loads and feature Zero Arc Point Switching, minimizing relay-contact wear from inrush loads. The MPS Auxiliary Packs require power form a UVPP series power pack to actuate their contact closure. The auxiliary packs are plenum rated and easily mount inside or outside of a junction box or inside a ballast or driver cavity, (given space provided).

## **PRODUCT FEATURES**

- Plenum rated
- Self-contained relay
- MPSA uses electrically held normally open relay
- MPSHD uses robust latching relay provides unsurpassed and unrestricted performance
- 100-277VAC, 50/60Hz
- Regulated 24 VDC current; 100 mA output
- · Easily mounts inside or outside a junction box; inside a fixture
- UL and cUL listed
- Five-year limited warranty
- Manual On available in MPSHD model
- Power Indicator light in MPSHD model
- Zero Arc Point Switching
