Features	• Has a strong backing, making it a good choice for general masking applications.				
	• Offers excellent holding at both room temperature and at a higher bake oven temperature.				
	• Has been laboratory tested on painted steel panels and found to remove cleanly at bake temperatures up to 300°F (149°C) for 30 minutes. The actual temperature and time performance may be higher or lower for a given application. Clean removal can vary dependent on surface type, processing conditions such as multiple bakes, type of paint involved as well as the temperature of the surface at removal. We recommend testing the product under your conditions to determine if it meets your needs.				

tape may become difficult to remove.
