

# Product Change Notification

## TE Connectivity

**Product Change Notification:** PCN-22-134440

**PCN Date:** 31-MAR-22

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

**General Product Description:**

8 and 14 position AMPSEAL plug assembly

**Description of Changes**

This PCN is an addendum to PCN-22-127818. The Industrial and Commercial Transportation business unit of TE Connectivity is making a material change to the perimeter seal used on the AMPSEAL Sealed Plug Assembly for the part number(s) listed below. The material change would have included a color change to the seals but that change will not happen because of successful material color matching by the seal vendor. These PNs are TE proprietary designs, therefore considered catalog/general market product. PPAP request must be submitted within 14 days of PCN submission via [ict-ppap-request@te.com](mailto:ict-ppap-request@te.com) or ePPAP system. Submission will not occur without request. If PPAP requested, disposition response is required within 14 days of submit date or it will be considered approved. Product drawing(s) is affected. Dear Customer, we hereby inform you of this change. The change is necessary to avoid supply chain disruption. The change does not impact performance. **IMPORTANT:** The current and previous revisions of these parts can be used interchangeably in the field. The change(s) are being phased in gradually and previous revision can remain stocked until use. Shipments of both configurations may be mixed

**Reason for Changes:**

**PCN Attributes:**

**Product Category:**

Seals And Cavity Plugs

**Kind of Change:**

Material

**Change Feature:**

Material Change

**Potential Customer Impact:**

Risk mitigation

**Remarks:**

This PCN is an addendum to PCN-22-127818. The material used on the peripheral seal is changing to prevent supply chain disruptions. The material change would have included

a color change to the seals but that change will not happen because of successful material color matching by the vendor
