

## **MAGNET-43-22**

Ruland Retaining Magnet Base, OD 43mm, Center to Center 22mm, Thread M4, Rubber

## **Description**

Ruland MAGNET-43-22 is a retaining magnet base with a 43mm outer diameter, 22mm center to center dimension, M4 thread, 10.3mm height, and 85 N magnetic force. It is designed to mate with flanged bolt bases, two-way base connectors, and one-way connectors with the same center to center dimension. MAGNET-43-22 is made of neodymium, iron, and boron and it is covered with a rubber jacket for durability in industrial, medical, food processing, and packaging environments. It is used for portability in applications for mounting sensors, screens, reflectors, plexiglass machine guards, and other industrial components. This magnetic base has high magnetic force to keep components in place during operation while being easy for a user to remove by hand when it needs to be moved. MAGNET-43-22 will not mar the surface it is attached to helping to protect sheet metal, extruded aluminum framing, and other objects it may be attached to. It is manufactured by Otto Ganter, inventoried by Ruland, and RoHS3 compliant.
