PCB temperature sensing Communications • All Sensing and Co Computers • Rechargeable battery packs Ð Low-cost applications with a maximum temperature of 150 °C [302 **Product Search** °F Automotive • Part number search: Description 173 Series and 175 Series Thermistors are Use (*) to expand search designed to be mounted using robotics onto rigid or flexible PC boards. They are particularly suited for PC boards with a high Specification Search density of discrete components. The solderplated, nickel barrier terminations are easily soldered and meet ANSI/J-STD-002 Method B. These products are designed to withstand solder temperatures of 260 °C for 30 seconds. Available on tape and reel for automated assembly. Supporting Documentation None Available **Product Specifications** Global Availability Nominal Resistance at 10,000 Ohm

25 °C [77 °F]

25 °C [77 °F] Tolerance

Accuracy

R-T Curve	16
Operating Temperature Range	-60 °C to 125 °C [-76 °F to 257 ° F]
Maximum Diameter	EIA 0805 SMD
Time Constant in Air	10.0 s
Dissipation Constant	3,5 m/W°C
Series Name	173
