## Series 07 Operating Characteristics

Trip curves presented are based on typical samples and are for reference. Please consult the factory for more specific application information. Trip curves are specified at 25°C / 77°F

## Series 07 Physical Configuration

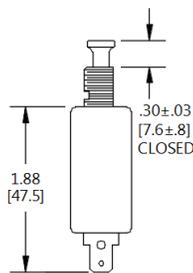

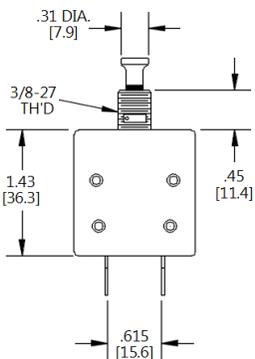

### Case Sizes: Models 752 - 762 (See Part Numbering Guide)

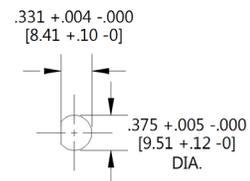

Models 752 and 762 offer single-pole, switchable circuit protection in a compact package size. Standard 0.250" quick-connect terminals are available, as is a "push-pull" actuator with imprinted amp rating. Through-the-panel mounting is facilitated by a 3/8"-27 diameter threaded bushing with a D-shaped flat for anti-rotational requirements.

Amp stamp and flat on bushing may be rotated 180° from that shown.

Recommended bushing torque 10 in-lbs.

Note: All dimensions are in inches [mm]

SUGGESTED PANEL MOUNTING HOLE

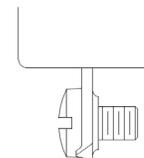

All Series 07 Models have the actuator button imprinted with the amp rating. The flat area on the panel cutout should be to the left of the actuator in vertical orientation.

### Mounting Hardware (See Part Numbering Guide)

Knurlnut (Nylon) Palnut Knurlnut Hexnut Instruction Plate

### Standard terminals on Model 772

Model 772, rated at 30A and 40A comes with standard #10-32 screw terminals
