DATA SHEET

Penetration temperature probe with bevelled penetration tip

Technical data

Penetration temperature probe			
Sensor		Thermocouple type K Pt100, Pt1000	
Measurement range		-50+260 °C short-time up to +300 °C	
Accuracy	Thermocouple type K Pt1000 Pt100	IEC 584 Class 1 IEC 751 Class B IEC 751 Class B	
Measurement current	Pt1000	max. 0,3 mA	
	Pt100	max. 1 mA	
Connection type	Thermocouple type K Pt1000, Pt100	2-wires connection 4-wires connection	
Nominal length		100 mm	
Diameter		4 mm	
Material	Probe Handle	Stainless steel 1.4571 PEEK	
Electrical connection		open ends 30 mm, blank	
Connection cable	Length Cross section/color	3000 mm Thermocouple type K: 2 x 0,22 mm ² / green Pt1000, Pt100: 4 x 0,22 mm ² / white PTFE/shield/PTFE	
Ingress protection		IP67	
0			

Characteristical features

- Ergonomic handle made of PEEK
- Protection IP67
- · Material is food suitable
- Shock resistant

Areas of application

- Food inspection
- Butcher machines
- Freezers
- · Fermenting units
- Backing ovens
- · Cook- and smoking units
- · Quality control in the food industry
- In the kitchen

Features

The special construction of these robust penetration temperature probes makes them ideal for the control of cooking and baking processes in all domains of the food and beverage industry.

The protection tube is made of stainless steel and has a bevelled penetration tip. All the types are vibration and shock resistant. The ergonomic handle and the cable are easy to clean as well as acid resistant. The probes are distinguished by a high mechanical robustness.

Ordering information

Article	ArtNo.
Penetration temperature probe thermocouple type K	0600 1112-100
Penetration temperature probe Pt1000	0600 0066-100
Penetration temperature probe Pt100	0600 0065-100

DATA SHEET

Penetration temperature probe with bevelled penetration tip

Dimensions

Ø 4 Protectiv tube, stainless steel 1.4571 open ends, 100 blank 30 Ø 10 ۷ Handle made of PEEK 4 3000 Connection cable, PTFE/shield//PTFE, 0,22 mm², Outer diameter 3,9 mm
