

922, 923 & 924 Midget Flanged Incandescent Lampholders

Overview

The 922, 923 and 924 Series are relampable midget flanged base lampholders. The mating lens cap accepts a T-1 3/4 midget flanged base incandescent lamp, held in the lens assembly by means of a friction fit which insures good contact and prevents the lamp from falling out when the lens is removed. A Littelites Lens Cap Assembly must be used with the holder to hold the lamp in proper relationship to the socket contact.

Approvals

UL Recognized.
