

## Models # 303119Z and 303119 (Current Sensing Fixed Foil Resistor Chips VCS1625Z/VCS1625 Configuration) Screen/Test Flow in Compliance with EEE-INST-002, (Tables 2A and 3A, Film/Foil, Level 1) and MIL-PRF-55342

### INTRODUCTION

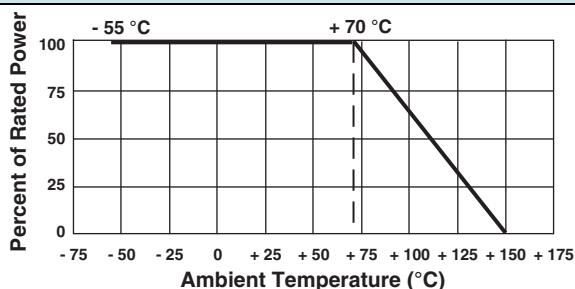

The Z-foil technology provides a significant reduction of the resistive component's sensitivity to ambient temperature variations (TCR) and applied power changes (PCR). Designers can now guarantee a high degree of stability and accuracy in fixed-resistor applications using solutions based on Vishay's revolutionary Z-foil technology. 0.05 ppm/°C absolute TCR removes errors due to temperature gradients.

Models 303119Z and 303119 are surface mount chip resistors designed with 4 pads for Kelvin connection. Utilizing Vishay's Bulk Metal® Z-foil as the resistance element, 303119Z provides performance capabilities far greater than other resistor technologies can supply in a product of comparable size.

These small devices dissipate heat almost entirely through the pads so surface mount users are encouraged to be generous with the board's pads and traces. Gold terminations are available as well.

Our application engineering department is available to advise and to make recommendations.

**FIGURE 1 - POWER DERATING CURVE**

### FEATURES

- Temperature coefficient of resistance (TCR):  
± 0.05 ppm/°C typical (0 °C to + 60 °C)  
± 0.2 ppm/°C typical (- 55 °C to + 125 °C, + 25 °C ref.)  
(see table 1)
- Resistance range: 0.01 Ω to 10 Ω
- Vishay Foil resistors are not restricted to standard values, specific "as required" values can be supplied at no extra cost or delivery (e.g. 1.234 Ω vs. 1 Ω)
- Tolerance: to ± 0.5 %
- Power coefficient "ΔR due to self heating": 5 ppm at rated power
- Load life stability: 0.05 % at 70 °C, 2000 h at rated power
- Electrostatic discharge (ESD) up to 25 000 V
- Short time overload < 0.02 %
- Power rating: 0.5 W at + 70 °C (figure 1)
- Non inductive, non capacitive design
- Rise time: 1 ns effectively no ringing
- Current rating: 5 A maximum
- Current noise: < - 40 dB
- Voltage coefficient: < 0.1 ppm/V
- Non inductive: < 0.08 μH
- Non hot spot design
- For prototypes units, append a "U" to the model number (example: 303119ZU). These units have all of the table 2A (page 3) 100 % tests performed, with no destructive qualification testing required (table 3A, page 3). For more information, please contact [foil@vishaypg.com](mailto:foil@vishaypg.com)
- For oriented performances please contact us

### TERMINATIONS

- Two options are available:
  - tin/lead plated
  - gold plated

**TABLE 1 - SPECIFICATIONS**

MODEL NUMBER	RESISTANCE RANGE	TIGHTEST RESISTANCE TOLERANCE	TYPICAL TCR (- 55 °C to + 125 °C, + 25 °C ref.)	MAXIMUM TCR	POWER RATING at + 70 °C <sup>(1)</sup>	MAXIMUM CURRENT <sup>(1)</sup>
