

## Item description

This fieldbus coupler connects the WAGO I/O System as a slave to the PROFIBUS fieldbus.

Subject to changes. Please also observe the further product documentation!

The fieldbus coupler detects all connected I/O modules and creates a local process image. This process image may include a mixed arrangement of analog (word-by-word data transfer) and digital (bit-by-bit data transfer) modules.

The process image can be transferred via the PROFIBUS fieldbus to the memory of the control system.

The local process image is divided into two data zones containing the data received and the data to be sent. The process data can be sent via PROFIBUS to a control system for further processing. The process output data is sent via PROFIBUS.

The data of the analog modules is stored in the process image that is created automatically according to the order in which the modules are connected to the coupler. The bits of the digital modules are sent byte by byte and added to the analog data. If the amount of digital I/O information exceeds eight bits, the coupler automatically starts with a new byte.

## Data Notes

### Note

For new installations, please consider 750-333 PROFIBUS DP fieldbus coupler with extended functionality.

**Note: Configuration files required (GSD)!**

## Technical data

| Communication   | PROFIBUS   |
|---|--|
| Number of fieldbus nodes on master (max.)             | 96   |
| Number of I/O points                                  | 6,000  |
| Baud rate   | 9.6 kBd ... 12 MBd   |
| Bus segment length (max.)                             | 1200 m   |
| Transmission medium                                   | Cu cable per EN 50170  |
| Transmission time                                     | typ. 1 ms (10 couplers; each 32 digital I/O and 12 Mbaud) max. 3.3 ms    |
| Number of modules per node (max.)                     | 64   |
| Input and output process image (fieldbus) max.        | 128 bytes/128 bytes  |
| Supply voltage (system)                               | 24 VDC (-25 ... +30 %); via pluggable connector (CAGE CLAMP® connection) |
| Current consumption (5 V system supply)               | 350 mA   |
| Total current (system supply)                         | 1,650 mA   |
| Supply voltage (field)                                | 24 VDC (-25 ... +30 %); via power jumper contacts                        |
| Input current (typ.) at nominal load (24 V)           | 500 mA   |
| Power supply efficiency (typ.) at nominal load (24 V) | 87 %   |
| Isolation   | 500 V system/field   |
| Number of outgoing power jumper contacts              | 3  |
| Current carrying capacity (power jumper contacts)     | 10 A   |

Subject to changes. Please also observe the further product documentation!
