APPLICATION

"bun THERMO THERMOWELL II" is a "two channel" temperature recorder and alarm system with two external sensors designed for installation in the fluids stream. It is powered by 2 replaceable AA batteries for up to 6 years and connects directly to Wi-Fi.

More than an accurate meter and a reliable logger, "bun THERMOWELL II" is also a cloud-based alarm system.

All setting parameters like measurement intervals, upload intervals, minimum and

maximum allowed temperature thresholds can be set through a web-based application on any platform. It sends out email and text message alarms as soon as temperature exceeds or falls below pre-set limits. It also provides access to the records history, graphs and periodical reports. It can be used for monitoring HVAC systems, boilers, water heaters, chillers, food or medicine processing facilities, etc.

GENERAI	_ SPECIFICA [·]	TIONS

Sensor		2 x Temperature with thread	
Temperature measurement and	°C	-55 to +125	
alarm range (Sensor only)	°F	-67 to +257	
Upload temperature range*	°C	-5 to +70	
	°F	20 to +160	
Temperature measurement	°C	± 0.5 (± 0.9 °F)	
accuracy			
Power supply		2 x AA replaceable batteries	
Sensor's protection class		IP 67	
Compliances		IEEE 802.3, EN 61326-1, EN 61010, EN 12830,	
		FCCID: 2AHMR-ESP12F, CE, ROHS, HACCP	
Battery life*		Up to 6 years	
Upload intervals		One hour to once a week (or on demand)	
Record intervals		1 minute to 120 minutes (down 2 sec. by	
		order)	
Interface		Wi-Fi - IEEE 802.3 – 2.4 GHz	
Max. number of internal records		16,384 – Automatic cloud sync and replace	
Probes		Stainless steel - 1/2" Thread - 3/4" to 12" length	

*Upload temperature range is the ambient condition required for the device to stay fully operational. These operations include being able to connect and sync with the cloud and send out alarms. However, the device can continue recording the data in its internal memory while in temperature measurement range.

*Depends on reading and upload intervals and environmental conditions. Battery life is more than 6 years in a standard set up. (Standard set up is room temperature 20°C measurement every 15 minutes upload every 48 hours).
