Where every mW counts

Today, power supply units require more sophisticated methods for improving performance while energy-saving regulations push for greater efficiency.

VIPerPlus accepts the challenge, combining an 800 V avalanche rugged power section with state-of-the-art PWM circuitry for control, and offering a comprehensive set of features and built-in protections. The result is an SMPS design that meets the most demanding energy-saving regulations and more: high reliability, flexibility and minimal component count.

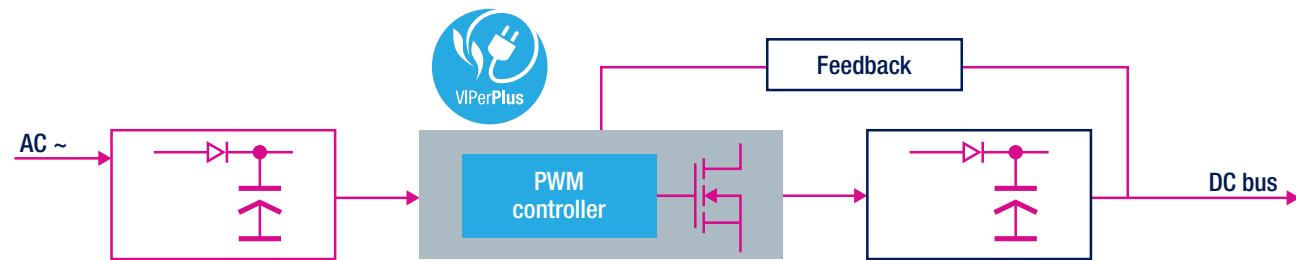

MAIN APPLICATIONS

- Metering
- Lighting
- Home appliances
- Home automation
- Consumer and adapters
- Automotive

GET IT ALL WITH VIPerPlus

- A Plus in efficiency
 - The easiest way to comply with the most stringent energy-saving regulations
- A Plus in reliability
 - For an improved SMPS lifetime
 - 800 V avalanche-rugged power MOSFET allowing ultra wide V_{AC} input range to be covered
- A Plus in versatility
 - Fitting most popular topologies and power ranges up to 15 W
 - Smart stand by architecture using VIPer zero power
- A Plus in cost-effectiveness
 - Small, highly-integrated ICs reduce the number of required external components

MAIN FUNCTIONAL BLOCKS

FAMILY PORTRAIT

Zero-power mode	VIPerPlusOP			$V_{BVDS} = 800 \text{ V}$
Low voltage/minimal BoM	VIPerPlus series 1	VIPer01	VIPerOP	
Quasi resonant	VIPerPlus series 5		VIPer11*	
Minimal BoM	VIPerPlus series 6	VIPer06	VIPer25	VIPer35
Brown-out	VIPerPlus series 7	VIPer16	VIPer26	
Peak power	VIPerPlus series 8	VIPer17	VIPer27	VIPer37
			VIPer28	VIPer38

Different control selections

	Different MOSFET sizes for different output power capabilities				
Flyback converter: 85-265 V _{AC}	4 W	6 W	7 W	12 W	15 W
Buck converter	100 mA	200 mA	*200 mA/*300 mA	350 mA	600 mA
Max R _{DSON} / I _{DLIM}	32 Ω 350 mA	24 Ω 400 A	20 Ω *400 mA/*600 mA	7 Ω 700 mA	4.5 Ω 1 A

DIFFERENTIATORS - FIND THE PLUS FOR YOUR APPLICATION

Quasi-resonant	VIPerPlus series 5						
Jittered frequency (30, 60 or 115/120 kHz)	VIPerPlusOP	VIPerPlus series 1	VIPerPlus series 6	VIPerPlus series 7	VIPerPlus series 8		
Brown-out protection (settable)	VIPerPlus series 5			VIPerPlus series 7			
Low input voltage (18 VDC)	VIPerPlus series 1						
Extra power timer (peak power)							
Double-level OCP	VIPerPlus series 5			VIPerPlus series 7	VIPerPlus series 8		
Feed forward compensation	VIPerPlus series 5						
Embedded E/A 3.3 V, 1.2 V (V*1 & VOP)	VIPerPlusOP	VIPerPlus series 1	VIPerPlus series 6				
Floating E/A ground (for easy negative output setting)	VIPerPlusOP						
Self-supply option (remove auxiliary winding)	VIPerPlusOP	VIPerPlus series 1	VIPerPlus series 6				
Wide range V_{cc} (4.5 to 30 V)	VIPerPlusOP	VIPerPlus series 1					
V_{cc} protection	VIPerPlusOP	VIPerPlus series 1	VIPerPlus series 6				
Flux runaway protection (for low start up peak current)	VIPerPlusOP	VIPerPlus series 1					
Zero power mode (ZPM)	VIPerPlusOP						
Input OVP	VIPerPlus series 1						
Output OVP	VIPerPlus series 1	VIPerPlus series 5	VIPerPlus series 7	VIPerPlus series 8			
PWM current mode using optocoupler Cycle-by-cycle OCP Light load management (Burst mode/PFM) Soft start up Thermal shutdown Short-circuit protection Automatic restart after fault	VIPerPlusOP 10 mW 4 mW (ZPM)	VIPerPlus series 1 10 mW	VIPerPlus series 5 30 mW	VIPerPlus series 6 30 mW	VIPerPlus series 7 30 mW	VIPerPlus series 8 30 mW	

TOPOLOGIES- BEST FIT FOR THE MOST POPULAR ARCHITECTURES

Isolated flyback	Primary Side Regulation (PSR)	VIPerPlusOP	VIPerPlus series 1	VIPerPlus series 6
	Secondary Side Regulation (SSR)	VIPerPlusOP	VIPerPlus series 1	VIPerPlus series 5
		VIPerPlusOP	VIPerPlus series 1	VIPerPlus series 6
Non-isolated	Flyback/buck/buck boost	VIPerPlusOP	VIPerPlus series 1	VIPerPlus series 6

VIPerPlus series

VIPerPlusOP: ZERO POWER MODE

VIPerOP
7 W
V_{BVDSs} 800 V
Max R_{DSon} 20 Ω I_{DLIM} 400 mA

RECOMMENDED FOR

- Home appliances
- Small Home appliances
- Home lighting
- Home automation

DIFFERENTIATORS

- Fixed frequency with jittering reduces the EMI allowing the minimal bill of material
- Zero power mode (ZPM) allows smart turn ON and OFF through button or MCU
- Integrated error amplifier with 1.2 V reference and floating ground to allow direct feedback and simplify BoM for negative output
- Wide supply voltage range: 4.5 V to 30 V
 - 4.5 V allows external supply from low voltage output (5 V)
 - 30 V allows wide auxiliary voltage in case the transformer is used

- Pulse-skip protection to prevent flux runaway and the peak start current
- Topology supported: flyback (PSR and SSR), buck, buck-boost

VIPerPlus series 1: MINIMAL BoM & LOW VOLTAGE APPLICATION

VIPer01	VIPer11*
4 W	7 W
V_{BVDSs} 800 V	
Max R_{DSon} 30 Ω I_{DLIM} 120/240/360 mA	Max R_{DSon} 20 Ω I_{DLIM} 370/480/590 mA

VIPer11*: coming soon

RECOMMENDED FOR

- Home appliances
- Small Home appliances
- Home lighting
- Home automation

DIFFERENTIATORS

- Fixed frequency with jittering reduces the EMI allowing the minimal bill of material
- Disable pin to set the input or output OVP
- Integrated error amplifier with 1.2 V reference to allow direct feedback by resistor divider
- HV current source starts at 18 VDC input voltage (only VIPer01)
- Wide supply voltage range: 4.5 V to 30 V
 - 4.5 V allows external supply from low voltage output (5 V)
 - 30 V allows wide auxiliary voltage in case the transformer is used

- Pulse-skip protection to prevent flux runaway and the peak start current.
- Topology supported: flyback (PSR and SSR), buck, buck-boost

VIPerPlus series 5: QUASI-RESONANT

VIPer25	VIPer35
12 W	15 W
$V_{BVDS} 800 \text{ V}$	
Max R_{DSON} 7 Ω I_{DLIM} 700 mA	Max R_{DSON} 4.5 Ω I_{DLIM} 1 A

DIFFERENTIATORS

- The quasi-resonant operation reduces the switching losses and improves power conversion efficiency at wide range load
- Quasi resonant operations reduces the EMI allowing to minimize the input filter size
- Feed forward compensation allows a stable power capability for a wide input voltage
- Embedded protections: output OVP, short circuit/OLP, 2nd OCP, settable brown-out
- Topology supported: isolated flyback- SSR

RECOMMENDED FOR

- Consumer
- Adapters
- Air conditioning

VIPerPlus series 6: MINIMAL BoM & AUTOMOTIVE

VIPer06	VIPer16 VIPerA16*	VIPer26
4 W	6 W	12 W
$V_{BVDS} 800 \text{ V}$		
Max R_{DSON} 32 Ω I_{DLIM} 350 mA	Max R_{DSON} 24 Ω I_{DLIM} 400 mA	Max R_{DSON} 7 Ω I_{DLIM} 700 mA

DIFFERENTIATORS

- Fixed frequency with jittering reduces the EMI allowing the minimal bill of material and reduces the number of required external components
- Integrated error amplifier allows direct feedback using a resistor divider
- No auxiliary winding costs
- Feedback disconnection protection
- Topology supported: flyback (PSR and SSR), buck, and buck-boost

RECOMMENDED FOR

- Home appliances
- Lighting
- Home automation
- Metering
- Automotive

* AEC-Q100 qualified

VIPerPlus series 7: BROWN-OUT

VIPer17	VIPer27	VIPer37
6 W	12 W	15 W
V_{BVDSs} 800 V		
Max R_{DSon} 24 Ω I_{DLIM} 400 mA	Max R_{DSon} 7 Ω I_{DLIM} 700 mA	Max R_{DSon} 4.5 Ω I_{DLIM} 1 A

DIFFERENTIATORS

- Fixed frequency with jittering reduces the EMI allowing the minimal bill of material and reduces the number of required external components
- Brown out protection with configurable minimum input voltage
- Embedded protections: output OVP, short circuit/OLP, 2nd OCP
- Topology supported: isolated flyback-SSR

RECOMMENDED FOR

- Adapters
- Lighting
- Industrial power supplies
- Air conditioning

VIPerPlus series 8: PEAK POWER

VIPer28	VIPer38
12 W/20 W (peak)	15 W/25 W (peak)
V_{BVDSs} 800 V	
Max R_{DSon} 7 Ω I_{DLIM} 800 mA	Max R_{DSon} 4.5 Ω I_{DLIM} 1.15 A

DIFFERENTIATORS

- Fixed frequency with jittering reduces the EMI allowing the minimal bill of material and reduces the number of required external components
- Extra power timer (peak power) for improved response during load transient
- Embedded protections: output OVP, short circuit/OLP, 2nd OCP
- Topology supported: isolated flyback-SSR

RECOMMENDED FOR

- Metering
- Lighting
- Consumer

A Plus for your applications

A PLUS FOR METERING

REQUIREMENTS

- High voltage robustness
- High immunity to electrical discharge
- Reduced noise in the communication band
- Peak power for data transfer

RECOMMENDED:

VIPerPlus series 6

VIPerPlus series 8

KEY BENEFITS FOR METERING

- Three switching frequency options to avoid noise in the communication band
- 800 V avalanche-rugged power MOSFET allowing ultra wide range input V_{AC} to be covered
- Embedded error amplifier for direct feedback from output or primary regulation
- Settable timer for peak power capability

10

A PLUS FOR LIGHTING

REQUIREMENTS

- Low standby consumption
- High efficiency
- Robustness
- Cost saving
- Reduced size

RECOMMENDED:

VIPerPlusOP

VIPerPlus series 1

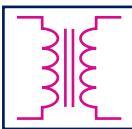

VIPerPlus series 5

VIPerPlus series 6

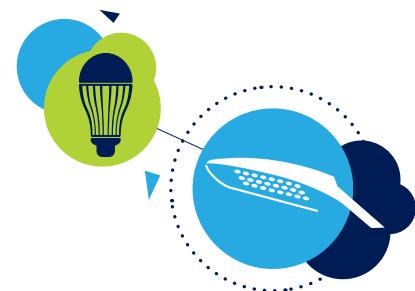

BEST-FIT TOPOLOGIES

- Non isolated converter
 - buck
 - buck boost (negative output)
 - flyback with direct output feedback

- Isolated Flyback
 - SSR with optocoupler
 - Peak power

KEY BENEFITS FOR LIGHTING

- Energy-saving: 10 mW @ no load @ 230 V_{AC} and 4 mW in ZPM @ 230 V_{AC}
- Quasi-resonant for high efficiency
- 800 V avalanche-rugged power MOSFET allowing ultra wide range input V_{AC} to be covered
- Reduced peak drain current during the start up
- Smart and efficient buck led driver using the floating ground and low ref voltage
- Embedded error amplifier for direct feedback from output or primary regulation
- Operating temperature: -40 to +150 °C
- Brown-out with settable turn-ON and turn-OFF thresholds

BEST-FIT TOPOLOGIES

- Non isolated converter
 - buck
 - buck boost (negative output)
 - flyback with direct output feedback

- Isolated Flyback
 - SSR with optocoupler
 - PSR by auxiliary winding
 - Quasi-resonant

A PLUS FOR HOME APPLIANCES

REQUIREMENTS

- Low standby power
- High efficiency at light load
- Small EMI input filter
- Ultra-wide input voltage
- Small size

RECOMMENDED:

VIPerPlusOP

VIPerPlus series 1

VIPerPlus series 6

KEY BENEFITS FOR HOME APPLICATIONS

- Frequency jittering reduces the EMI allowing small input filter
- Compliance with the more stringent energy saving regulations
- Zero Power Mode allowing IC shut down and wake up using smart interface with MCU for touch button or remote control
- 800 V avalanche-rugged power MOSFET allowing ultra wide range input V_{AC} to be covered
- Self-supply for reduced part count
- Embedded error amplifier for direct feedback from output or primary regulation
- Reduced peak drain current during the start up
- Wide supply voltage range: 4.5 to 30 V
 - 4.5 V allows external supply from low voltage output (5 V)
 - 30 V allows wide auxiliary voltage in case the transformer is used

A PLUS FOR HOME AUTOMATION

REQUIREMENTS

- Small size
- Low standby power
- High efficiency at light load
- Small EMI input filter
- Reduced part count

RECOMMENDED:

VIPerPlusOP

VIPerPlus series 1

VIPerPlus series 6

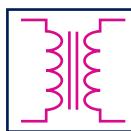

KEY BENEFITS FOR HOME AUTOMATION

- Energy saving: 10 mW @ no load @ 230 V_{AC}, 4 mW in ZPM @ 230 V_{AC}
- 800 V avalanche-rugged power MOSFET allowing ultra wide range input V_{AC} to be covered
- Embedded auto-restart protections
- Self-supply for reduced part count
- Embedded error amplifier for direct feedback from output or primary regulation
- Operating temperature: -40 to +150 °C
- Remote control availability through ZPM function (only ViperOP)

BEST-FIT TOPOLOGIES

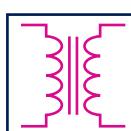

- Non isolated converter
 - buck
 - buck boost (negative output)
 - flyback with direct output feedback
- Isolated Flyback
 - SSR with optocoupler
 - PSR by auxiliary winding

BEST-FIT TOPOLOGIES

- Non isolated converter
 - buck
 - buck boost (negative output)
 - flyback with direct output feedback
- Isolated Flyback
 - SSR with optocoupler
 - PSR by auxiliary winding

A PLUS FOR CONSUMER AND ADAPTERS

REQUIREMENTS

- Low standby power
- High efficiency
- Reliability
- Cost saving
- Minimized size and weight
- Robustness

RECOMMENDED:

VIPerPlus series 5

VIPerPlus series 8

KEY BENEFITS FOR CONSUMER AND ADAPTERS

- Energy saving: 30 mW no load consumption @ 230 V_{AC}
- Compliance with the more stringent energy saving regulations
- Quasi resonant for high efficiency
- 800 V avalanche-rugged power MOSFET allowing ultra wide range input V_{AC} to be covered
- Peak power capability for improved response during load transient
- Operating temperature: -40 to +150 °C
- Brown-out with settable turn-ON and turn-OFF thresholds

BEST-FIT TOPOLOGIES

- Isolated Flyback
- SSR with optocoupler
- Peak power
- Quasi-resonant

A PLUS FOR AUTOMOTIVE

REQUIREMENTS

- AEC-Q100 qualified
- Capable of supporting the Production Part Approval Process (PPAP)
- Strong thermal robustness
- Reliability
- Reduced size and BoM

RECOMMENDED:

VIPerA16

KEY BENEFITS FOR AUTOMOTIVE

- 800 V avalanche-rugged power MOSFET with embedded failure protections
- AEC-Q100 qualified
- Operating temperature: -40 to 150 °C
- Design 5 W SMPS with minimal bill of material
- Energy saving: 30 mW no load consumption @ 230 V_{AC}
- Embedded auto-restart protections and thermal shutdown

BEST-FIT TOPOLOGIES

- Non isolated converter
 - buck
 - buck boost (negative output)
 - flyback with direct output feedback

- Isolated Flyback
 - SSR with optocoupler
 - PSR by auxiliary winding

Evaluation boards

NON-ISOLATED, INDUCTOR-BASED TOPOLOGIES - BUCK OR BUCK-BOOST UP TO I_{out} 300 mA AT WIDE AND ULTRA-WIDE INPUT VOLTAGE RANGE

Order code	Part number	Short description	V _{in}	V _{out} /I _{out}	Document
