

CY3269N LIGHTING STARTER DEMONSTRATION KIT QUICK START GUIDE

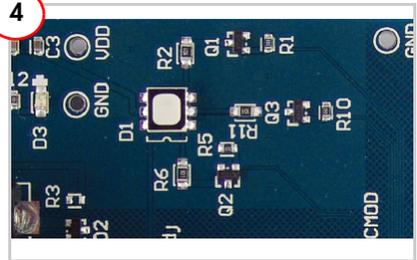

Remove the CY3269N kit from the package.

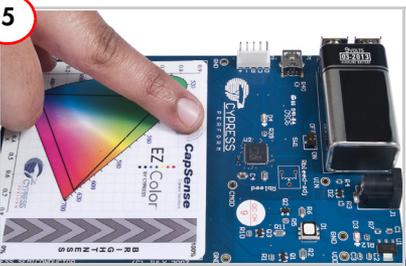

Insert the 9-V battery into the battery holder. Press firmly in place.

Tap the color gamut to view different colors from the RGB LED. Adjust the brightness using the slider available to the right of the gamut.

View the output on the RGB LED.

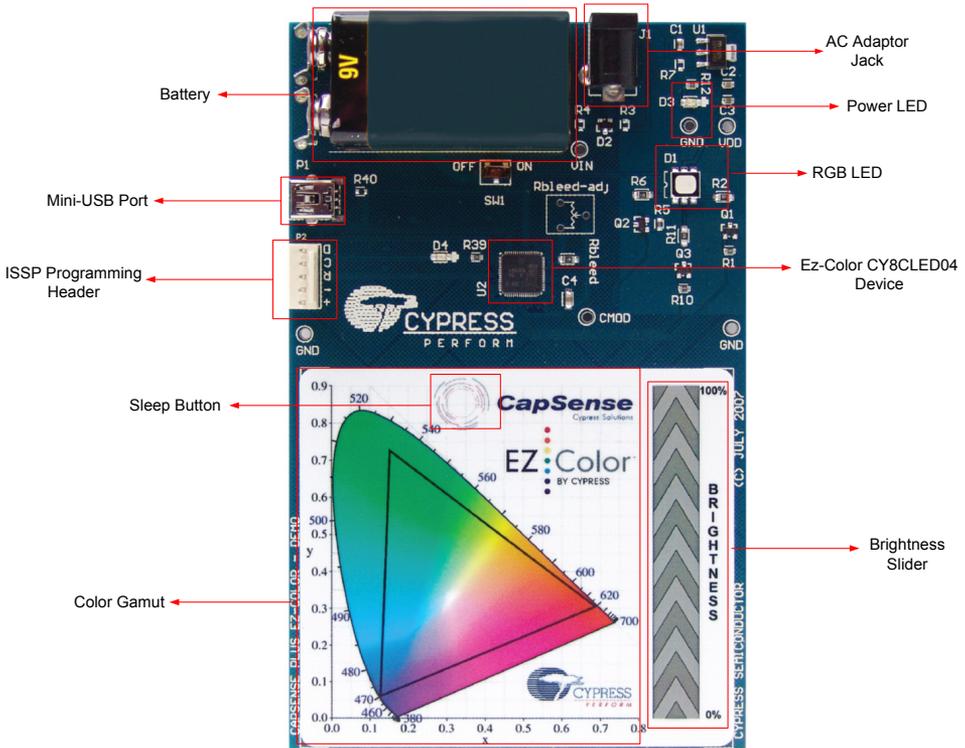

To put the board to "sleep" while powered, press and hold the circular emblem to the left of the CapSense logo.
