

Data sheet

SAW duplexer
Automotive telematics
LTE band 3

Series/type: B4406

Ordering code: B39182B4406P810

Date: October 11, 2019

Version: 2.4

DCN: 80-PA243-390 Rev. A

RF360 products mentioned within this document are products of RF360 Europe GmbH and other subsidiaries of RF360 Holdings Singapore Pte. Ltd. (collectively, the "RF360 Subsidiaries").

These materials, including the information contained herein, may be used only for informational purposes by the customer. The RF360 Subsidiaries assume no responsibility for errors or omissions in these materials or the information contained herein. The RF360 Subsidiaries reserve the right to make changes to the product(s) or information contained herein without notice. The materials and information are provided on an AS IS basis, and the RF360 Subsidiaries assume no liability and make no warranty or representation, either expressed or implied, with respect to the materials, or any output or results based on the use, application, or evaluation of such materials, including, without limitation, with respect to the non-infringement of trademarks, patents, copyrights or any other intellectual property rights or other rights of third parties.

No use of this documentation or any information contained herein grants any license, whether express, implied, by estoppel or otherwise, to any intellectual property rights, including, without limitation, to any patents owned by QUALCOMM Incorporated or any of its subsidiaries.

Not to be used, copied, reproduced, or modified in whole or in part, nor its contents revealed in any manner to others without the express written permission of RF360 Europe GmbH.

Qualcomm is a trademark of Qualcomm Incorporated, registered in the United States and other countries. Other product and brand names may be trademarks or registered trademarks of their respective owners.

This technical data may be subject to U.S. and international export, re-export, or transfer ("export") laws. Diversion contrary to U.S. and international law is strictly prohibited.

1 Application

- Low-loss SAW duplexer for Band 3
- Low insertion attenuation
- Low amplitude ripple
- Usable pass band 75 MHz
- Single-ended to balanced transformation in Antenna-Rx path
- Impedance transformation 50 Ω to 100 Ω in Antenna-Rx path
- High Tx Rx isolation

2 Features

- Package size 2.0±0.1 mm × 1.6±0.1 mm
- Package height 0.45 mm (max.)
- Approximate weight 5 mg
- RoHS compatible
- Package for Surface Mount Technology (SMT)
- Ni/Au-plated terminals
- Filter surface passivated
- Electrostatic Sensitive Device (ESD)
- Moisture Sensitivity Level 2a (MSL2a)
- AEC-Q200 qualified component family (Grade 3: -40 °C to +85 °C)

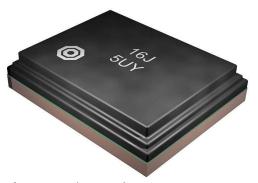

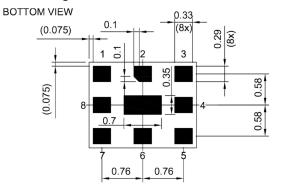

Figure 1: Picture of component with example of product marking.

5 Matching circuit

Europe GmbH

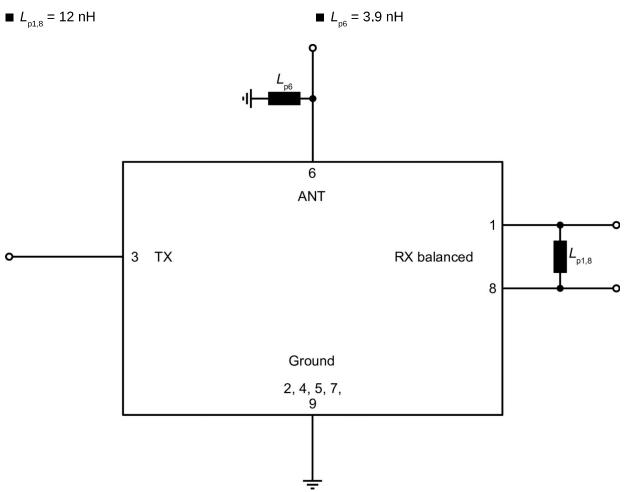

Figure 3: Schematic of matching circuit.

6 Characteristics

6.1 TX - ANT

Temperature range for specification

TX terminating impedance

ANT terminating impedance RX terminating impedance

 $T_{\text{SPEC}} = -30 \, ^{\circ}\text{C} \dots +85 \, ^{\circ}\text{C}$

 $Z_{TV} = 50 \Omega$

 Z_{ANT} = 50 Ω // 3.9 nH¹) Z_{RX} = 100 Ω // 12 nH¹)

Characteristics TX – ANT				$\begin{array}{c} \textbf{min.} \\ \text{for } T_{\text{SPEC}} \end{array}$	typ. @ +25 °C	$\begin{array}{c} \text{max.} \\ \text{for } T_{\text{SPEC}} \end{array}$	
Center frequency			f _c	_	1747.5	_	MHz
Maximum insertion attenuation			$\boldsymbol{\alpha}_{max}$				
	1710 1785	MHz		_	2.5	4.1	dB
	1714 1781	MHz		_	2.0	3.1	dB
Amplitude ripple (p-p)			Δα				
Per 5MHz channel	1710 1785	MHz		_	0.6	1.4	dB
Maximum VSWR			$VSWR_{max}$				
@ TX port	1710 1785	MHz		_	1.5	2.0	
@ ANT port	1710 1785	MHz		_	1.5	2.0	
Minimum attenuation			$\boldsymbol{\alpha}_{min}$				
	100 1565.42	MHz		30	33	_	dB
	1565.42 1573.38	MHz		40	46	_	dB
	1573.38 1577.46	MHz		42	47	_	dB
	1577.46 1585.42	MHz		40	44	_	dB
	1597.55 1605.88	MHz		35	39	<u> </u>	dB
	1605.88 1680	MHz		20	30	<u> </u>	dB
	1805 1880	MHz		43	46	_	dB
	1920 1980	MHz		20	30	_	dB
	2110 2170	MHz		27	40	_	dB
	2400 2500	MHz		30	34	_	dB
	2620 2690	MHz		27	31	_	dB

¹⁾ See Sec. Matching circuit (p. 6).

6.2 ANT - RX

Temperature range for specification $T_{\rm SPEC} = -30~{\rm ^{\circ}C}~...~+85~{\rm ^{\circ}C}$ TX terminating impedance $Z_{\rm TY} = 50~{\rm ^{\circ}C}$

ANT terminating impedance $Z_{\text{ANT}} = 50 \ \Omega \ \text{//} \ 3.9 \ \text{nH}^{\text{1}})$ RX terminating impedance $Z_{\text{RX}} = 100 \ \Omega \ \text{//} \ 12 \ \text{nH}^{\text{1}})$

Characteristics ANT – RX				$\begin{array}{c} \textbf{min.} \\ \textbf{for } T_{\text{SPEC}} \end{array}$	typ. @ +25 °C	$\begin{array}{c} \text{max.} \\ \text{for } T_{\text{SPEC}} \end{array}$	
Center frequency			f _C	_	1842.5	_	MHz
Maximum insertion attenuation			$\boldsymbol{\alpha}_{\text{max}}$				
	1805 1880	MHz		_	3.2	4.4	dB
Amplitude ripple (p-p)			Δα				
Per 5MHz channel	1805 1880	MHz		_	0.7	1.8	dB
Maximum VSWR			$VSWR_{max}$				
@ ANT port	1805 1880	MHz		_	1.6	2.0	
@ RX port	1805 1880	MHz		_	1.6	2.0	
Minimum common-mode rejection ratio			$CMRR_{min}$				
	1805 1880	MHz		202)	25	_	dB
Minimum attenuation			$\boldsymbol{\alpha}_{_{min}}$				
	100 1710	MHz		35	55	_	dB
	1710 1785	MHz		43	50	_	dB
	1965 2690	MHz		30	52	_	dB

¹⁾ See Sec. Matching circuit (p. 6).

A combination of 10° phase balance and 1 dB amplitude balance corresponds to 19.6 dB CMRR.

6.3 TX - RX

Temperature range for specification $T_{\text{SPEC}} = -30 \,^{\circ}\text{C} \dots +85 \,^{\circ}\text{C}$ TX terminating impedance $Z_{\text{TX}} = 50 \,^{\circ}\text{C} \dots +85 \,^{\circ}\text{C}$ ANT terminating impedance $Z_{\text{TX}} = 50 \,^{\circ}\text{C} \dots +85 \,^{\circ}\text{C}$

ANT terminating impedance $Z_{\rm ANT} = 50~\Omega$ // $3.9~{\rm nH^{1}})$ RX terminating impedance $Z_{\rm RX} = 100~\Omega$ // $12~{\rm nH^{1}})$

Characteristics TX – RX				min.	typ.	max.	
				for T _{SPEC}	@ +25 °C	for T_{SPEC}	
Minimum isolation			α_{min}				
	1710 1785	MHz		50	55	_	dB
	1805 1880	MHz		50	53	_	dB
Minimum common-mode isolation			$\boldsymbol{\alpha}_{min}$				
	1710 1785	MHz		50	55	<u>—</u>	dB

¹⁾ See Sec. Matching circuit (p. 6).

7 **Maximum ratings**

Operable temperature	T _{OP} = −40 °C +85 °C	
Storage temperature	T _{STG} ¹⁾ = −40 °C +85 °C	
DC voltage	$ V_{DC} ^{2} = 0 \text{ V (max.)}$	
Input power	P _{IN}	
@ TX port: 1710 1785 MHz	29 dBm	Continuous wave for 5000 h @ 55 °C.
Other frequency ranges @ TX port	10 dBm	Continuous wave for 5000 h @ 55 °C.

Not valid for packaging material. Storage temperature for packaging material is -25 °C to +40 °C. In case of applied DC voltage blocking capacitors are mandatory.

8 Transmission coefficients

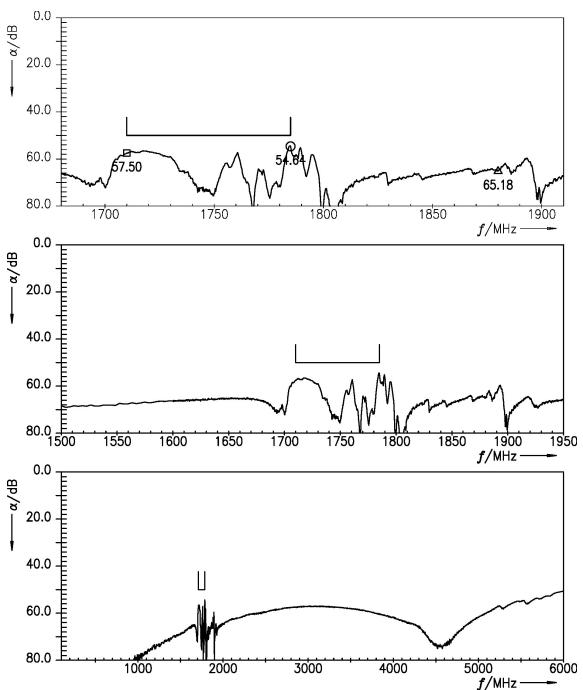

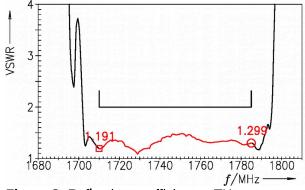

Figure 7: Common-mode isolation TX – RX.

9 Reflection coefficients

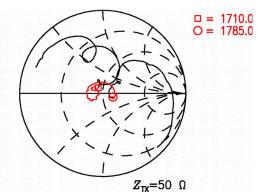

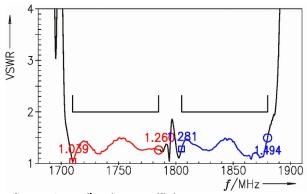

Figure 8: Reflection coefficient at TX port.

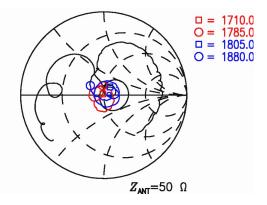

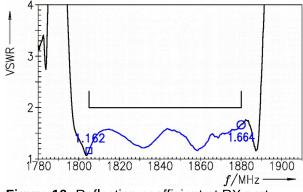

Figure 9: Reflection coefficient at ANT port.

 $Z_{\text{RX}} = 100 \ \Omega$

Figure 10: Reflection coefficient at RX port.

10 Common-mode rejection ratio

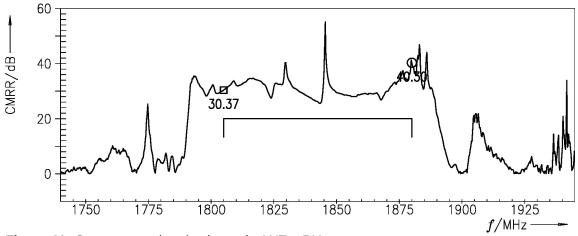

Figure 11: Common-mode rejection ratio ANT – RX.

11 Packing material

11.1 Tape

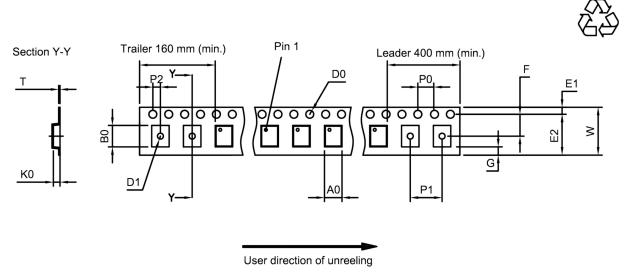

Figure 12: Drawing of tape (first-angle projection) for illustration only and not to scale. The valid tape dimensions are listed in Table 1.

A ₀	1.8±0.05 mm
Bo	2.25±0.05 mm
D ₀	1.5+0.1/-0 mm
D_1	1.0 mm (min.)
E ₁	1.75±0.1 mm

E ₂	6.25 mm (min.)
F	3.5±0.05 mm
G	0.75 mm (min.)
K ₀	0.6±0.05 mm
Po	4.0±0.1 mm

Pı	4.0±0.1 mm
P_2	2.0±0.05 mm
Т	0.25±0.03 mm
W	8.0+0.3/-0.1 mm

Table 1: Tape dimensions.

11.2 Reel with diameter of 180 mm

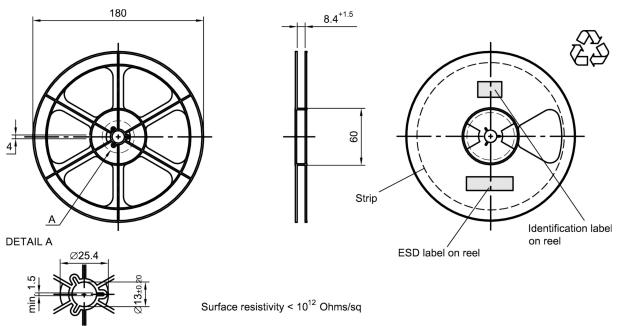

Figure 13: Drawing of reel (first-angle projection) with diameter of 180 mm.

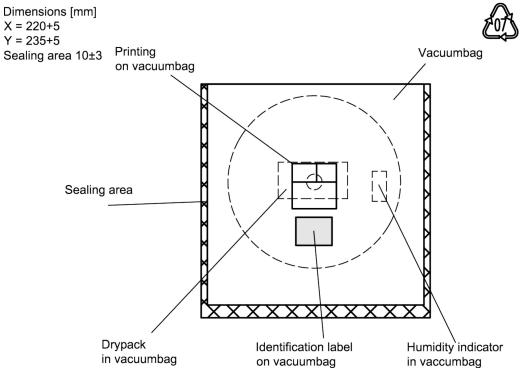

Figure 14: Drawing of moisture barrier bag (MBB) for reel with diameter of 180 mm.

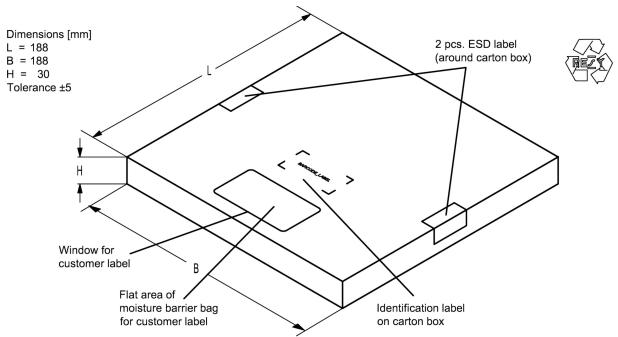

Figure 15: Drawing of folding box for reel with diameter of 180 mm.

12 Marking

Products are marked with product type number and lot number encoded according to Table 2:

■ Type number:

The 4 digit type number of the ordering code, e.g., B3xxxxB1234xxxx, is encoded by a special BASE32 code into a 3 digit marking.

Example of decoding type number marking on device in decimal code.

16J=>1234 $1 \times 32^2 + 6 \times 32^1 + 18 (=J) \times 32^0$ =1234

The BASE32 code for product type B4406 is 49P.

■ Lot number:

The last 5 digits of the lot number, e.g., are encoded based on a special BASE47 code into a 3 digit marking.

Example of decoding lot number marking on device in decimal code.

 5UY
 =>
 12345

 $5 \times 47^2 + 27 (=U) \times 47^1 + 31 (=Y) \times 47^0$ =
 12345

Adopted BASE32 code for type number			
Decimal	Base32	Decima l	Base32
value	code	value	code
0	0	16	G
1	1	17	Н
2	2	18	J
3	3	19	К
4	4	20	М
5	5	21	N
6	6	22	Р
7	7	23	Q
8	8	24	R
9	9	25	S
10	Α	26	Т
11	В	27	V
12	С	28	W
13	D	29	Х
14	E	30	Y
15	F	31	Z

Adopted BASE47 code for lot number			
Decimal	Base47	Decimal	Base47
value	code	value	code
0	0	24	R
1	1	25	S
2	2	26	Т
3	3	27	U
4	4	28	V
5	5	29	W
6	6	30	Х
7	7	31	Y
8	8	32	Z
9	9	33	b
10	Α	34	d
11	В	35	f
12	С	36	h
13	D	37	n
14	E	38	r
15	F	39	t
16	G	40	V
17	Н	41	\
18	J	42	?
19	K	43	{
20	L	44	}
21	М	45	<
22	N	46	>
23	Р		

Table 2: Lists for encoding and decoding of marking.

13 Soldering profile

The recommended soldering process is in accordance with IEC $60068-2-58-3^{rd}$ edit and IPC/JEDEC J-STD-020B.

ramp rate	≤ 3 K/s
preheat	125 °C to 220 °C, 150 s to 210 s, 0.4 K/s to 1.0 K/s
T > 220 °C	30 s to 70 s
T > 230 °C	min. 10 s
T > 245 °C	max. 20 s
<i>T</i> ≥ 255 °C	-
peak temperature T_{peak}	250 °C +0/-5 °C
wetting temperature T_{min}	230 °C +5/-0 °C for 10 s ± 1 s
cooling rate	≤ 3 K/s
soldering temperature T	measured at solder pads

Table 3: Characteristics of recommended soldering profile for lead-free solder (Sn95.5Ag3.8Cu0.7).

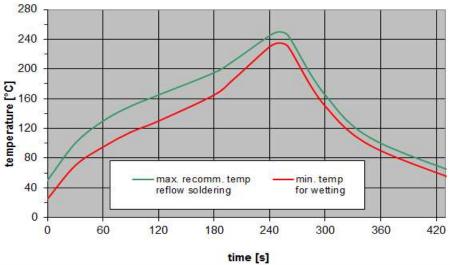

Figure 16: Recommended reflow profile for convection and infrared soldering – lead-free solder.

14 Annotations

14.1 RoHS compatibility

ROHS-compatible means that products are compatible with the requirements according to Art. 4 (substance restrictions) of Directive 2011/65/EU of the European Parliament and of the Council of June 8th, 2011, on the restriction of the use of certain hazardous substances in electrical and electronic equipment ("Directive") with due regard to the application of exemptions as per Annex III of the Directive in certain cases.

14.2 Scattering parameters (S-parameters)

The pin/port assignment is available in the headers of the S-parameter files. Please contact your local RF360 sales office.

15 Cautions and warnings

15.1 Display of ordering codes for RF360 products

The ordering code for one and the same product can be represented differently in data sheets, data books, other publications and the website of RF360, or in order-related documents such as shipping notes, order confirmations and product labels. The varying representations of the ordering codes are due to different processes employed and do not affect the specifications of the respective products. Detailed information can be found on the Internet under https://rffe.gualcomm.com/.

15.2 Material information

Due to technical requirements components may contain dangerous substances. For information on the type in question please also contact one of our sales offices.

For information on recycling of tapes and reels please contact one of our sales offices.

15.3 Moldability

Before using in overmolding environment, please contact your local RF360 sales office.

15.4 Package information

Landing area

The printed circuit board (PCB) land pattern (landing area) shown is based on RF360 internal development and empirical data and illustrated for example purposes, only. As customers' SMD assembly processes may have a plenty of variants and influence factors which are not under control or knowledge of RF360, additional careful process development on customer side is necessary and strongly recommended in order to achieve best soldering results tailored to the particular customer needs.

Dimensions

Unless otherwise specified all dimensions are understood using unit millimeter (mm).

Dimensions do not include burrs.

Projection method

Unless otherwise specified first-angle projection is applied.

16 Important notes

The following applies to all products named in this publication:

- 1. Some parts of this publication contain statements about the suitability of our products for certain areas of application. These statements are based on our knowledge of typical requirements that are often placed on our products in the areas of application concerned. We nevertheless expressly point out that such statements cannot be regarded as binding statements about the suitability of our products for a particular customer application. As a rule, RF360 Europe GmbH and its affiliates are either unfamiliar with individual customer applications or less familiar with them than the customers themselves. For these reasons, it is always ultimately incumbent on the customer to check and decide whether an RF360 product with the properties described in the product specification is suitable for use in a particular customer application.
- 2. We also point out that in individual cases, a malfunction of electronic components or failure before the end of their usual service life cannot be completely ruled out in the current state of the art, even if they are operated as specified. In customer applications requiring a very high level of operational safety and especially in customer applications in which the malfunction or failure of an electronic component could endanger human life or health (e.g. in accident prevention or life-saving systems), it must therefore be ensured by means of suitable design of the customer application or other action taken by the customer (e.g. installation of protective circuitry or redundancy) that no injury or damage is sustained by third parties in the event of malfunction or failure of an electronic component.
- 3. The warnings, cautions and product-specific notes must be observed.
- 4. In order to satisfy certain technical requirements, some of the products described in this publication may contain substances subject to restrictions in certain jurisdictions (e.g. because they are classed as hazardous). Useful information on this will be found in our Material Data Sheets on the Internet (https://rffe.qualcomm.com). Should you have any more detailed questions, please contact our sales offices.
- 5. We constantly strive to improve our products. Consequently, the products described in this publication may change from time to time. The same is true of the corresponding product specifications. Please check therefore to what extent product descriptions and specifications contained in this publication are still applicable before or when you place an order. We also reserve the right to discontinue production and delivery of products. Consequently, we cannot guarantee that all products named in this publication will always be available.
 - The aforementioned does not apply in the case of individual agreements deviating from the foregoing for customer-specific products.
