

CRN

Semirigid, flame-retardant, polyolefin heat-shrinkable tubing

Heat-shrinkable CRN tubing is ideally suited for wire strain-relief applications. It provides excellent strain-relief and insulation of weak points such as wire splices and terminations. CRN tubing helps ensure a reliable connection because it transfers the flex stress away from typically sensitive points such as solder and crimp joints. CRN tubing has a broad range of uses including component protective covering and packaging. The flame-retardant material is fabricated from radiationcrosslinked polyolefin and exhibits excellent mechanical and chemical properties. It meets major military and industrial specifications for an all-purpose, semirigid tubing. CRN tubing is abrasion-resistant. It's superior chemical properties permit satisfactory performance after exposure to common chemicals and solvents.

Only a few sizes of CRN tubing are required to cover a wide range of substrate diameters.

Temperature rating

Full recovery temperature:	135°C
Continuous operating temperature:	–55°C to 135°C

Specifications*			.R .

3/4	19.0	0.750	9.5	0.375	0.89 ± 0.12	0.035 ± 0.005

**Wall thickness will be less if tubing recovery is restricted during shrinkage

Ordering information

Colors	Standard	Black	
	Nonstandard	Clear (not flame-retardant)	
Size selection	Always order the largest size that will shrink snugly over the component being covered.		
Standard packaging	4-foot lengths		
Ordering description	Specify product name, size, and color; for example, CRN 1/4-0 (0 = Black).
