Digital Power
Plug-In Module (PIM)
User's Guide

Note the following details of the code protection feature on Microchip devices:

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as "unbreakable."

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

Information contained in this publication regarding device applications and the like is provided only for your convenience and may be superseded by updates. It is your responsibility to ensure that your application meets with your specifications. **MICROCHIP MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND WHETHER EXPRESS OR IMPLIED, WRITTEN OR ORAL, STATUTORY OR OTHERWISE, RELATED TO THE INFORMATION, INCLUDING BUT NOT LIMITED TO ITS CONDITION, QUALITY, PERFORMANCE, MERCHANTABILITY OR FITNESS FOR PURPOSE.** Microchip disclaims all liability arising from this information and its use. Use of Microchip devices in life support and/or safety applications is entirely at the buyer's risk, and the buyer agrees to defend, indemnify and hold harmless Microchip from any and all damages, claims, suits, or expenses resulting from such use. No licenses are conveyed, implicitly or otherwise, under any Microchip intellectual property rights unless otherwise stated.

Microchip received ISO/TS-16949:2009 certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona; Gresham, Oregon and design centers in California and India. The Company's quality system processes and procedures are for its PIC® MCUs and dsPIC® DSCs, KEELoo® code hopping devices, Serial EEPROMS, microperipherals, nonvolatile memory and analog products. In addition, Microchip's quality system for the design and manufacture of development systems is ISO 9001:2000 certified.

dsPIC33EP128GS806 Digital Power PIM User's Guide

NOTES:

Preface

NOTICE TO CUSTOMERS

All documentation becomes dated, and this manual is no exception. Microchip tools and documentation are constantly evolving to meet customer needs, so some actual dialogs and/or tool descriptions may differ from those in this document. Please refer to our website (www.microchip.com) to obtain the latest documentation available.

Documents are identified with a “DS” number. This number is located on the bottom of each page, in front of the page number. The numbering convention for the DS number is “DSXXXXXXXXXA”, where “XXXXXXXX” is the document number and “A” is the revision level of the document.

For the most up-to-date information on development tools, see the MPLAB® IDE online help. Select the Help menu, and then Topics to open a list of available online help files.

INTRODUCTION

This chapter contains general information that will be useful to know before using the dsPIC33EP128GS806 Digital Power Plug-In Module (PIM). Items discussed in this chapter include:

- Document Layout
- Conventions Used in this Guide
- Recommended Reading
- The Microchip Website
- Product Change Notification Service
- Customer Support
- Document Revision History

DOCUMENT LAYOUT

This document describes how to use the dsPIC33EP128GS806 Digital Power PIM as a development tool to emulate and debug firmware on a target board. The document is organized as follows:

- **Chapter 1. “Overview”** – This chapter introduces the dsPIC33EP128GS806 Digital Power PIM and provides a brief overview of its various features.
- **Appendix A. “Board Layout and Schematics”** – This appendix presents the schematics and the board layouts for the dsPIC33EP128GS806 Digital Power PIM.
- **Appendix B. “Bill of Materials (BOM)”** – This appendix presents the Bill of Materials for the dsPIC33EP128GS806 Digital Power PIM.

CONVENTIONS USED IN THIS GUIDE

This manual uses the following documentation conventions:

DOCUMENTATION CONVENTIONS

Description	Represents	Examples
Arial font:		
Italic characters	Referenced books	MPLAB® IDE User's Guide
	Emphasized text	...is the <i>only</i> compiler...
Initial caps	A window	the Output window
	A dialog	the Settings dialog
	A menu selection	select Enable Programmer
Quotes	A field name in a window or dialog	"Save project before build"
Underlined, italic text with right angle bracket	A menu path	<u>File</u> >Save
Bold characters	A dialog button	Click OK
	A tab	Click the Power tab
N'Rnnnn	A number in verilog format, where N is the total number of digits, R is the radix and n is a digit.	4'b0010, 2'hF1
Text in angle brackets < >	A key on the keyboard	Press <Enter>, <F1>
Courier New font:		
Plain Courier New	Sample source code	#define START
	Filenames	autoexec.bat
	File paths	c:\mcc18\h
	Keywords	_asm, _endasm, static
	Command-line options	-Opa+, -Opa-
	Bit values	0, 1
	Constants	0xFF, 'A'
Italic Courier New	A variable argument	<i>file.o</i> , where <i>file</i> can be any valid filename
Square brackets []	Optional arguments	mcc18 [options] <i>file</i> [options]
Curly brackets and pipe character: { }	Choice of mutually exclusive arguments; an OR selection	errorlevel {0 1}
Ellipses...	Replaces repeated text	var_name [, var_name...]
	Represents code supplied by user	void main (void) { ... }

RECOMMENDED READING

This user's guide describes how to use the dsPIC33EP128GS806 Digital Power PIM. Other useful document(s) are listed below. The following Microchip document(s) are recommended as supplemental reference resources.

- “**dsPIC33EPXXGS70X/80X Family Data Sheet**” (DS70005258) and is available for download from the Microchip website (www.microchip.com)

THE MICROCHIP WEBSITE

Microchip provides online support via our website at www.microchip.com. This website is used as a means to make files and information easily available to customers. Accessible by using your favorite Internet browser, the website contains the following information:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip consultant program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events; and listings of Microchip sales offices, distributors and factory representatives

PRODUCT CHANGE NOTIFICATION SERVICE

Microchip's customer notification service helps keep customers current on Microchip products. Subscribers will receive e-mail notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, access the Microchip website at www.microchip.com, click on **Product Change Notification** and follow the registration instructions.

CUSTOMER SUPPORT

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Corporate Application Engineer (CAE)
- Embedded Solutions Engineer (ESE)

Customers should contact their distributor, representative or Embedded Solutions Engineer (ESE) for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in the back of this document.

Technical support is available through the website at:

<http://www.microchip.com/support>.

DOCUMENT REVISION HISTORY

Revision A (June 2018)

This is the initial release of this document.

dsPIC33EP128GS806 Digital Power PIM User's Guide

NOTES:

Chapter 1. Overview

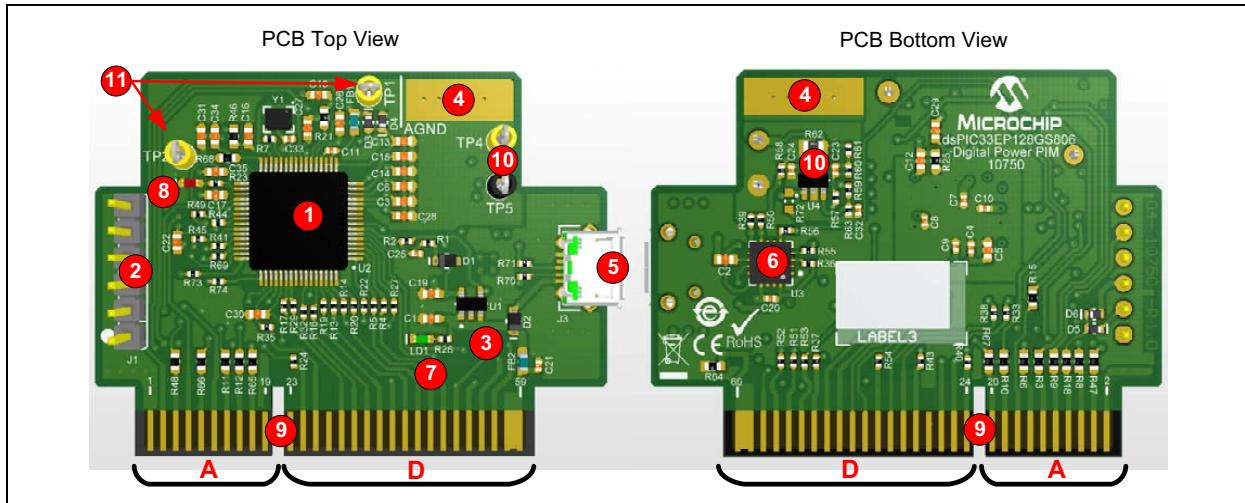

1.1 INTRODUCTION

The dsPIC33EP128GS806 Digital Power Plug-In Module (DP PIM) is a demonstration board that showcases the Microchip dsPIC33EP128GS806 16-Bit Digital Signal Controller (DSC) features. The DP PIM provides access to the dsPIC33EP128GS806 analog inputs, the Digital-to-Analog Converter (DAC) outputs, the Pulse-Width Modulation (PWM) outputs and the General Purpose Input and Output (GPIO) ports. The Microchip series of DP PIMs for digital power share the same pinout at the mating socket. However, these DP PIMs show slightly different performing characteristics.

1.2 FEATURES

The dsPIC33EP128GS806 DP PIM has the following features, as shown in [Figure 1-1](#):

FIGURE 1-1: dsPIC33EP128GS806 DP PIM

1. Microchip dsPIC33EP128GS806 16-Bit Digital Signal Controller (64-pin TQFP package).
2. ICSP™ programming header (6-pin, 2.54 mm header).
3. On-board LDO (3.6 VDC to 6.3 VDC) with Power Good (PG) function.
4. Solder pad for ground connection.
5. Micro USB connector.
6. MCP2221A USB to UART/I²C serial converter.
7. Power indicator LED (Green).
8. User LED (Red).
9. Board edge connection interface for analog inputs/outputs, PWM outputs and GPIO ports.
10. Analog input with op amp buffer via test point loop connector; can be used for Bode plot measurements.
11. Test point loops for DAC outputs.

Board dimensions are: 51 mm (length) x 38.5 mm (width).

1.2.1 Electrical Characteristics

Table 1-1 shows the electrical characteristics of the dsPIC33EP128GS806 DP PIM.

TABLE 1-1: ELECTRICAL CHARACTERISTICS

Parameter	Value
Input Voltage Range	3.6 VDC to 6.3 VDC
Current Consumption	<100 mA
Power Dissipation	<0.6W max.
Operating Temperature Range	-40°C to +85°C

1.2.2 Analog and Digital Signals

The dsPIC33EP128GS806 DP PIM ensures good signal integrity and provides all signals needed to control a power train. These signals are divided into two main sections: Analog, marked with A, and Digital, marked with D (see [Figure 1-1](#)):

1. Analog Section

The analog section is located at the left connector side (smaller section in [Figure 1-1](#)). It consists of 17 signals, all referenced to analog ground. These lines are split into four subsections:

- High-Speed Comparator Inputs: RC filtered with corner frequency of 10 MHz and maximum signal rise/fall time of 33 ns. These lines are designed to be used with on-chip comparators for signal zero-cross detections, etc.
- High-Speed ADC Inputs: RC filtered with corner frequency of 2 MHz and maximum signal rise/fall time of 180 ns. These lines are connected to the Track-and-Hold (T&H) circuitry of the dedicated ADC inputs and to the Sample-and-Hold (S&H) circuitry of the shared ADC inputs.
- Medium Speed ADC Inputs: RC filtered with corner frequency of 190 kHz and maximum signal rise/fall time of 1.8 μ s. These lines are connected to the Sample-and-Hold (S&H) circuitry of the shared ADC inputs. The different RC filtering is needed because of the significant difference between T&H and S&H circuitry, and the sampling times.
- DAC Output(s): These line(s) have a 560 Ohm series resistance. Please note that there is a capacitor placeholder on the board that can be used for additional filtering.

2. Digital Section

The digital section is located at the right connector side (larger section in [Figure 1-1](#)). It consists of 31 signals, all referenced to digital ground. These lines are split into four subsections:

- High-Speed PWM Outputs: Each line has a 75 Ω series resistance.
- Medium Speed GPIO: Each line has a 270 Ω series resistance.
- Programming/Debugging Lines: Each line has a 100 Ω series resistance.
- Communication Lines (SPI, I²C): Each line has a 75 Ω series resistance.

Note: RC filtering and series resistance are needed for good signal integrity and EMI issues. Hence, the board can be used for development purposes under frequent plug-in/out cycles. This decoupling also increases robustness in case of accidental shorts and EMC issues.

1.2.3 dsPIC33EP128GS806 DP PIM – PCB Edge Connector

The dsPIC33EP128GS806 DP PIM card has an edge connector compatible with any application board that provides a mating socket.

The mating socket type is Samtec, Inc.: MECF-30-01-L-DV-WT.

1.3 UART COMMUNICATION

The on-board USB to UART serial bridge enables easy serial connection to PCs. The USB port can provide power to the Digital Power PIM and allows the user to communicate with the dsPIC® Digital Signal Controller (DSC).

1.4 LOW-FREQUENCY BODE PLOT MEASUREMENTS

The dsPIC33EP128GS806 device, with the additional on-board circuitry, is able to perform Bode plot measurements without the need for an isolation transformer. The transformer might be required if the injecting signal tends to be at a very low frequency (for instance, in case of Power Factor Correction (PFC) applications).

Perform the following steps:

1. Solder the R72 (0Ω) resistor. Make sure that the AN5 line is not used by another low-impedance source.
2. Run the power stage in Open-Loop mode with a fixed duty cycle.
3. Connect the Bode 100 AC output to TP4 and TP5. The on-board operational amplifier is adding a $V_{DD}/2$ (1.65V) offset. In this case, no injection transformer is needed anymore.
4. Connect DAC1 to CH2 and DAC2 to CH1 of the Bode 100.
5. Use the AN5 input to sample the signal from Bode 100 in every PWM cycle at Frequency Switching (FSW) (action in firmware is needed).
6. Remove the $V_{DD}/2$ offset to regain a signal with no DC value (action in firmware is needed).
7. Add sampled AC signal to the nominal duty cycle (PDCx) (action in firmware is needed).
8. Use ADC2 to sample the output of the plant at FSW. The output can be:
 - Output voltage
 - Average coil current sampled at $T_{ON}/2$, where T_{ON} is the switch ON time.
9. Duty cycle input and plant output are converted into an analog signal using DAC1 and DAC2.

Measured transfer function is the plant (Power Stage + Digital Modulator) – after scaling and ADC sampling, versus digital duty cycle input (PDCx).

Note: Due to run-time delays of Sample-and-Hold circuits, and conversation time of ADC and DAC, this measurement is only recommended for low-frequency measurements: maximum two decades below sampling frequency.

dsPIC33EP128GS806 Digital Power PIM User's Guide

Figure 1-2 and Figure 1-3 show measuring procedure examples for plant and closed-loop measurements.

FIGURE 1-2: MEASURING PROCEDURE FOR PLANT MEASUREMENT

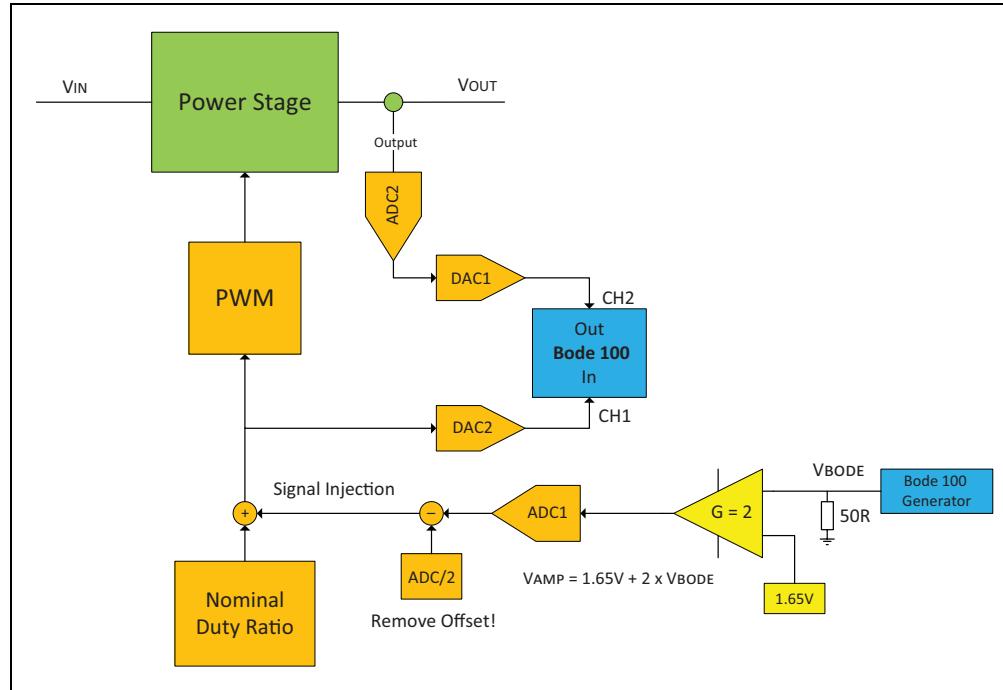

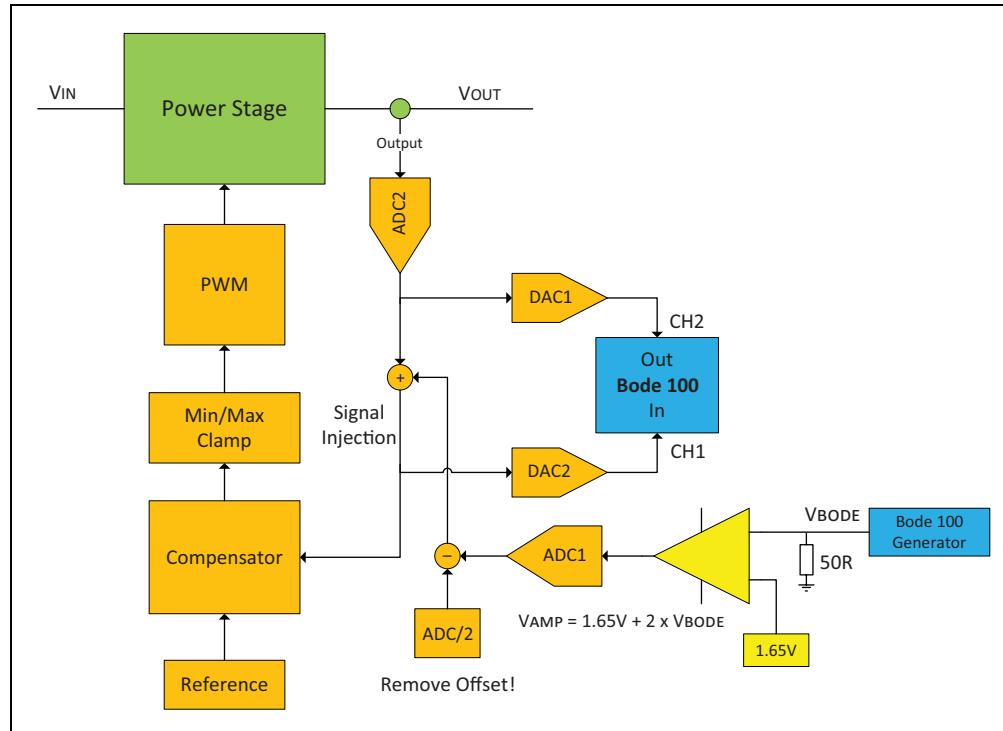

FIGURE 1-3: MEASURING PROCEDURE FOR CLOSED-LOOP MEASUREMENT

Appendix A. Board Layout and Schematics

This appendix contains the pinout, the schematics and the board layouts for the dsPIC33EP128GS806 DP PIM.

- [Pinout](#)
- [Board Schematics](#)
- [PCB Layout](#)

A.1 PINOUT

Pinout and electrical parameters are shown in [Table A-1](#).

TABLE A-1: PINOUT AND ELECTRICAL PARAMETERS

Name	Edge Connector Pin	Device Pin	Function/Description	Remark

1	LD1	Diode LED Green, 2V, 30 mA, 35 mcd, Clear, SMD, 0603	Lite-On®, Inc.	LTST-C190KGKT
1	LD2	Diode LED Red, 1.8V, 40 mA, 10 mcd, Clear, SMD, 0603	Lite-On, Inc.	LTST-C190KRKT
2	R1, R36	Resistor TKF, 10k, 1%, 1/10W, SMD, 0402	Panasonic Electronic Co.	ERJ-2RKF1002X
3	R2, R73, R74	Resistor TKF, 100R, 1%, 1/10W, SMD, 0402	Panasonic Electronic Co.	ERJ-2RKF1000X
15	R3, R6, R8, R9, R10, R11, R12, R15, R18, R46, R47, R48, R65, R66, R67	Resistor TKF, 150R, 1%, 1/10W, SMD, 0603	Stackpole Electronics, Inc.	RMCF0603FT150R
15	R4, R5, R7, R13, R14, R16, R17, R19, R20, R22, R29, R41, R45, R70, R71	Resistor TKF, 75R, 1%, 1/16W, SMD, 0402	Yageo Corporation	RC0402FR-0775RL
2	R21, R68	Resistor TKF, 560R, 1%, 1/10W, SMD, 0603	Yageo Corporation	RC0603FR-07560RL
2	R23, R26	Resistor TKF, 3.3k, 5%, 1/10W, SMD, 0402	Panasonic - ECG	ERJ-2GEJ332X
18	R24, R27, R32, R33, R35, R37, R38, R40, R43, R44, R49, R51, R52, R53, R54, R55, R56, R69	Resistor TKF, 270R, 5%, 1/10W, SMD, 0402	Panasonic - ECG	ERJ-2GEJ271X
2	R25, R64	Resistor TKF, 0R, 1/10W, SMD, 0603	NIC Components Corp.	NRC06Z0TRF
2	R39, R50	Resistor TKF, 4.7k, 5%, 1/10W, SMD, 0402	Panasonic - ECG	ERJ-2GEJ472X
1	R57	Resistor TKF, 49.9R, 1%, 1/16W, SMD, 0402	ROHM Semiconductor	MCR01MRTF49R9
1	R58	Resistor TKF, 10R, 1%, 1/16W, SMD, 0402	ROHM Semiconductor	MCR01MRTF10R0
3	R59, R60, R61	Resistor TKF, 10k, 0.5%, 1/16W, SMD, 0402	Susumu Co., Ltd.	RR0510P-103-D
1	R62	Resistor TKF, 49.9R, 1%, 1/8W, SMD 0805	Panasonic - ECG	ERJ-6ENF49R9V
1	R63	Resistor TKF, 3.3k, 0.5%, 1/16W, SMD, 0402	Panasonic Electronic Co.	ERA-2AED332X
3	TP1, TP2, TP4	Misc, Test Point PC Mini, 0.040", D, Yellow	Keystone Electronics Corp.	5004
1	TP5	Misc, Test Point Multipurpose Mini, Black	Keystone Electronics Corp.	5001

Bill of Materials (BOM)

TABLE B-1: dsPIC33EP128GS806 DIGITAL POWER PIM BILL OF MATERIALS (CONTINUED)

Qty.	Designator	Description	Manufacturer	Manufacturer Part Number
Microchip Parts				
1	U1	Microchip Analog LDO, 3.3V, MCP1755T-3302E/OT, SOT-23-5	Microchip Technology Inc.	MCP1755T-3302E/OT
1	U2	Microchip MCU, 16-Bit, 120 MHz, 128K, 8K, dsPIC33EP128GS806, TQFP-64	Microchip Technology Inc.	dsPIC33EP128GS806-I/PT
1	U3	Microchip Interface, USB, I ² C/UART, MCP2221A-I/ML, QFN-16	Microchip Technology Inc.	MCP2221A-I/ML
1	U4	Microchip Analog Op Amp, 1-Ch, 10 MHz, MCP6021T-E/OT, SOT-23-5	Microchip Technology Inc.	MCP6021T-E/OT
1	Y1	Microchip Clock Oscillator Single, 7.3728 MHz, DSC6011JI2A-007.3728, VDFN-4	Microchip Technology Inc.	DSC6011JI2A-007.3728
Mechanical Parts				
1	LABEL3	Label, AIPD Board Assembly	—	—
PCB				
1	PCB1	Printed Circuit Board	—	04-10750-R1.0
Do Not Populate Parts				
2	C18, C31	Capacitor Ceramic, 560 pF, 50V, 5%, C0G, NP0, SMD, 0603	KEMET	C0603C561J5GACTU
1	R72	Resistor TKF, 0R, 1/10W, SMD, 0603	NIC Components Corp.	NRC06Z0TRF

MICROCHIP

Worldwide Sales and Service

AMERICAS

Corporate Office
2355 West Chandler Blvd.
Chandler, AZ 85224-6199
Tel: 480-792-7200
Fax: 480-792-7277
