| Immersion 1 h 5 % NaOH  | No changes in appearance<br>Slight adhesión loss 1 mm at edges |

These 3M<sup>™</sup> VHB<sup>™</sup> Adhesive Transfer Tapes are made from the same adhesive system and are thermoplastic in nature, becoming softer as temperature increases and firmer as temperature decreases. As the adhesive becomes firmer, the adhesion performance generally increases. At low temperatures (lower than -40 °C, the 3M<sup>™</sup> VHB<sup>™</sup> Adhesive Transfer Tapes become very firm and glassy; the ability to absorb impact energy is reduced.

#### **Application Techniques**

Bond strength is dependent upon the amount of adhesive-tosurface contact developed. Firm application pressure helps develop better adhesive contact and improve bond strength. To obtain optimum adhesion, the bonding surfaces must be clean, dry, and well unified. Some typical surface cleaning solvents are isopropyl alcohol/water mixture or heptane. \*

Ideal tape application temperature range is 21 °C to 38 °C. Initial tape application to surfaces at temperatures below 10 °C is not recommended because the adhesive becomes too firm to adhere readily. However, once properly applied, low temperature holding is generally satisfactory.

\***Note**: Be sure to follow the manufacturer's precautions and directions for use when using solvents.

| Storage & Shelf Life        | Store at 16 °C – 25 °C and 40-65 % relative humidity in its original box. The product can be stored up to 18 months after production.   |

| Automotive Disclaimer       | Automotive Applications: This product is an industrial product and<br>has not been designed or tested for use in certain automotive<br>applications, including, but not limited to, automotive electric<br>powertrain battery or high voltage applications. This product does<br>not fully adhere to typical automotive design or quality system<br>requirements, such as IATF 16949 or VDA 6.3. This product may<br>not be manufactured in an IATF certified facility and may not meet<br>a Ppk of 1.33 for all properties. The product may not undergo an<br>automotive production part approval process (PPAP). Customer is<br>solely responsible for evaluating the product and determining<br>whether it is appropriate and suitable for customer's automotive<br>application and for conducting incoming inspections before use of<br>the product. Failure to do so may result in injury, death, and/or<br>harm to property. No written or verbal statement, report, data or<br>recommendation by 3M related to automotive use of the product<br>shall have any force or effect unless in an agreement signed by the<br>Technical Director of 3M's Automotive Division. Customer assumes<br>all responsibility and risk if customer chooses to use this product in<br>an automotive electric powertrain battery or high voltage<br>application, and 3M will not be liable for any loss or damage arising<br>from or related to the 3M product or customer's use of the product,<br>whether direct, indirect, special, incidental, or consequential<br>(including, but not limited to, lost profits or business opportunity or<br>recall costs), regardless of the legal or equitable theory asserted,<br>including, but not limited to, warranty, contract, negligence, or strict<br>liability. In no event shall 3M be liable for any damages in excess of<br>the purchase price paid for the product. |
|                             | NOTWITHSTANDING ANY OTHER STATEMENT TO THE<br>CONTRARY, 3M MAKES NO REPRESENTATIONS,<br>WARRANTIES OR CONDITIONS WHATSOEVER, EXPRESS OR<br>IMPLIED, REGARDING THE PRODUCT IF USED IN AN   |

AUTOMOTIVE ELECTRIC POWERTRAIN BATTERY OR HIGH VOLTAGE APPLICATION, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTY ON PERFORMANCE, LONGEVITY, SUITABILITY, COMPATIBILITY, OR INTEROPERABILITY, OR ANY IMPLIED WARRANTY OR CONDITION OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ARISING OUT OF A COURSE OF DEALING, CUSTOM, OR USAGE OF TRADE.

Important NoticeAll statements, technical information and recommendations<br/>contained in this document are based upon tests or experience that<br/>3M believes are reliable. However, many factors beyond 3M's<br/>control can affect the use and performance of a 3M product in a<br/>particular application, including the conditions under which the<br/>product is used and the time and environmental conditions in which<br/>the product is expected to perform. Since these factors are uniquely<br/>within the user's knowledge and control, it is essential that the user<br/>evaluate the 3M product to determine whether it is fit for a particular<br/>purpose and suitable for the user's method or application. All<br/>questions of liability relating to this product are governed by the<br/>terms of the sale subject, where applicable, to the prevailing law

Values presented have been determined by standard test methods and are average values not to be used for specification purposes. Our recommendations on the use of our products are based on tests believed to be reliable but we would ask that you conduct your own tests to determine their suitability for your applications. This is because 3M cannot accept any responsibility or liability direct or consequential for loss or damage caused as a result of our recommendations
