

Octopus Crash Sensor Brick

The Pi Supply Octopus Crash Sensor Brick is a sensor module based on a crash switch with high sensitivity.

What are Octopus Electronic Bricks?

Pi Supply Octopus Electronic Bricks can be used to build electronics projects just as easy as piling bricks. You can also connect Arduino compatible boards easily with various digital, analog and I2C/Uart interfaces. The breadboardless connections let you connect expansion modules like potentiometers, sensors, relays, servos, buttons in a plug and play way.

Specifications

- Arduino special module
- Compatible with sensor shield
- Output low level when touched, maintain high level when released
- Used for robot collision detection touch detection
- 3P buckled wires connector
- Easy to plug and play
- Able to achieve very interesting and an interactive work
