

**Mask Laundering

The mask should be laundered periodically. Woolite works well. Liquid detergents are better than dry in that there is less caking and frictional wear. Launder mask in cool or warm water, tumble dry with low heat or hang dry. Machine washing works well if using a standard house machine on gentle cycle. It is not recommended to launder these masks in heavy industrial laundry machines as it will lead to premature wear. Masks should be tumbled dry using low heat. DO NOT BLEACH. After laundering, verify (Rgp) < 1 x 10^7 ohms.
