

PCN - 12 030 R-1

Issue Date: April 16 2012

Change Description: selective plating has Gold or GXT plating in contact area and tin in soldering tail. Before change: the pin has fully plated Gold or GXT plating in all area. After change: the pin has fully plated Gold or GXT plating in all area. After change: the pin has fully plated Gold or GXT plating in all area, or has Gold or GXT plating in contact area and tin in soldering area at supplier's discretion. This change will not affect the product performance. Reason for Change: Change will allow dual production capability for these parts thus increasing security of supply and improved global logistics performance. By R-1: Added Detailed change description & Date of effectivity brought down to May 30th. Affected Parts: See attached list. Effective Date of Change: May 30 2012 Last Time Buy Date: N/A N/A N/A N/A N/A N/A Datasheet Attached? N/A Qual/Test Data Attached? N/A 2012 Samples Availability Date: May 15 2012					
Product Manager: Feagle Pan Subject: Notification of Planned Change Distribution: Global Type of Change: Design Change Fully plated Friction latch header will now be fully plated or selectively plated at supplier's discretion. "selective plating has Gold or GXT plating in contact area and tin in soldering tail. Before change: the pin has fully plated Gold or GXT plating in all area. After change: the pin has fully plated Gold or GXT plating in all area, or has Gold or GXT plating in co area and tin in soldering area at supplier's discretion. This change will not affect the product performance. Reason for Change: May 30 2012 Last Time Buy Date: N/A N/A N/A Last Time Shipment Date N/A N/A N/A Qual/Test Data Attached? N/A 15 2012	Product Name:	DUBOX / PV / BERGSTIK			
Subject: Notification of Planed Change Distribution: Global Type of Change: Design Change Fully plated Friction latch header will now be fully plated or selectively plated at supplier's discretion. "selective plating has Gold or GXT plating in contact area and tin in soldering tail. Change Description: Fully plated Friction latch header will now be fully plated or selectively plated at supplier's discretion. "selective plating has Gold or GXT plating in contact area and tin in soldering tail. Change Description: Before change: the pin has fully plated Gold or GXT plating in all area. After change: the pin has fully plated Gold or GXT plating in all area, or has Gold or GXT plating in coarea and tin in soldering area at supplier's discretion. This change will now dual production capability for these parts thus increasing security of supply and improved global logistics performance. Reason for Change: May 30 2012 Last Time Buy Date: N/A N/A N/A Last Time Shipment Date N/A N/A N/A Qual/Test Data Attached? N/A 15 2012 Gualatility Date: N/A 15 2012		BERGCON HEADER			
Distribution: Global Type of Change: Design Change Fully plated Friction latch header will now be fully plated or selectively plated at supplier's discretion. selective plating has Gold or GXT plating in contact area and tin in soldering tail. Before change: the pin has fully plated Gold or GXT plating in all area. Atter change: the pin has fully plated Gold or GXT plating in all area. Atter change: the pin has fully plated Gold or GXT plating in all area, or has Gold or GXT plating in contare area and tin in soldering area at supplier's discretion. This change will not affect the product performance. By R-1: Added Detated Change By R-1: Added Detated Change description & Date of effectivity brought down to May 30th. Affected Parts: See attached list. Effective Date of Change: May 30 2012 Last Time Buy Date: N/A N/A N/A Datasheet Attached? N/A N/A N/A Qual/Test Data Attached? N/A 2012 Samples Availability Date: May 15 2012	Product Manager:	Feagle Pan			
Type of Change: Design Change Fully plated Friction latch header will now be fully plated or selectively plated at supplier's discretion. "selective plating has Gold or GXT plating in contact area and tin in soldering tail. Before change: the pin has fully plated Gold or GXT plating in all area. After change: the pin has fully plated Gold or GXT plating in all area. After change: the pin has fully plated Gold or GXT plating in all area. After change: the pin has fully plated Gold or GXT plating in all area. After change: will not affect the product performance. Reason for Change: Change will allow dual production capability for these parts thus increasing security of supply and improved global logistics performance. By R-1: Added Detailed change description & Date of effectivity brought down to May 30th. Affected Parts: See attached list. Effective Date of Change: May 30 2012 Last Time Buy Date: N/A N/A N/A Datasheet Attached? N/A N/A N/A Datasheet Attached? N/A 15 2012 Samples Availability Date: May 15 2012	Subject:	Notification of Planned Change			
Change Description: Fully plated Friction latch header will now be fully plated or selectively plated at supplier's discretion. Selective plating has Gold or GXT plating in contact area and tin in soldering tail. Before change: the pin has fully plated Gold or GXT plating in all area. After change: the pin has fully plated Gold or GXT plating in all area. After change: the pin has fully plated Gold or GXT plating in all area, or has Gold or GXT plating in coarea and tin in soldering area at supplier's discretion. This change will not affect the product performance. Reason for Change: Change will allow dual production capability for these parts thus increasing security of supply and improved global logistics performance. By R-1: Added Detailed change description & Date of effectivity brought down to May 30th. Affected Parts: See attached list. Effective Date of Change: N/A N/A N/A N/A N/A Last Time Shipment Date N/A N/A N/A Datasheet Attached? N/A Qual/Test Data Attached? N/A Samples Availability Date: May 15 2012 End	Distribution:	Global			
Selective plating has Gold or GXT plating in contact area and tin in soldering tail. Before change: the pin has fully plated Gold or GXT plating in all area. After change: the pin has fully plated Gold or GXT plating in all area. After change: the pin has fully plated Gold or GXT plating in all area. After change: the pin has fully plated Gold or GXT plating in all area. After change: the pin has fully plated Gold or GXT plating in all area. This change will not affect the product performance. This change will not affect the product performance. By R-1: Added Detailed change description & Date of effectivity brought down to May 30th. Affected Parts: See attached list. Effective Date of Change: May 30 2012 Last Time Buy Date: N/A N/A N/A N/A N/A N/A N/A Datasheet Attached? N/A N/A Qual/Test Data Attached? N/A 2012 Samples Availability Date: May 15 2012	Type of Change:	Design Change			
Change Description: After change: the pin has fully plated Gold or GXT plating in all area, or has Gold or GXT plating in coarea and tin in soldering area at supplier's discretion. This change will not affect the product performance. Change will allow dual production capability for these parts thus increasing security of supply and improved global logistics performance. Reason for Change: Change will allow dual production capability for these parts thus increasing security of supply and improved global logistics performance. By R-1: Added Detailed change description & Date of effectivity brought down to May 30th. Affected Parts: See attached list. Effective Date of Change: May 30 2012 Last Time Buy Date: N/A N/A N/A N/A N/A N/A May Datasheet Attached? N/A N/A Qual/Test Data Attached? N/A 15 2012	Change Description:	Fully plated Friction latch header will now be fully plated or selectively plated at supplier's discretion. The selective plating has Gold or GXT plating in contact area and tin in soldering tail.			
After change: the pin has fully plated Gold or GXT plating in all area, or has Gold or GXT plating in coarea and tin in soldering area at supplier's discretion. This change will not affect the product performance. Reason for Change: Change will allow dual production capability for these parts thus increasing security of supply and improved global logistics performance. By R-1: Added Detailed change description & Date of effectivity brought down to May 30th. Affected Parts: See attached list. Effective Date of Change: May 30 2012 Last Time Buy Date: N/A N/A N/A N/A N/A N/A N/A Datasheet Attached? N/A N/A N/A Qual/Test Data Attached? N/A 15 2012		Before change: the pin has fully plated Gold or GXT plating in all area.			
Reason for Change: Change will allow dual production capability for these parts thus increasing security of supply and improved global logistics performance. By R-1: Added Detailed change description & Date of effectivity brought down to May 30th. Affected Parts: See attached list. Effective Date of Change: May 30 2012 Last Time Buy Date: N/A N/A N/A N/A N/A N/A Al/A Datasheet Attached? N/A N/A Qual/Test Data Attached? N/A 15 2012		After change: the pin has fully plated Gold or GXT plating in all area, or has Gold or GXT plating in conta area and tin in soldering area at supplier's discretion.			
Reason for Change: improved global logistics performance. By R-1: Added Detailed change description & Date of effectivity brought down to May 30th. Affected Parts: See attached list. Effective Date of Change: May 30 2012 Last Time Buy Date: N/A N/A N/A Last Disty Return Date: N/A N/A N/A Datasheet Attached? N/A N/A N/A Qual/Test Data Attached? N/A 15 2012		This change will not affect the product performance.			
Affected Parts: See attached list. Effective Date of Change: May 30 2012 Last Time Buy Date: N/A N/A N/A Last Disty Return Date: N/A N/A N/A Last Time Shipment Date N/A N/A N/A Datasheet Attached? N/A N/A N/A Qual/Test Data Attached? N/A 15 2012	Reason for Change:
