

Ultra Low Profile 0404 Balun 50Ω to 75Ω Balanced

Description

The BD2425N5075AHF is a low cost, low profile sub-miniature unbalanced to balanced transformer designed for differential inputs and output locations on modern chipsets in an easy to use surface mount package. The BD2425N5075AHF is halogen-free, ideal for high volume manufacturing and delivers higher performance than traditional ceramic baluns. The BD2425N5075AHF has an unbalanced port impedance of 50 Ω and a 75 Ω balanced port impedance. This transformation enables single ended signals to be applied to differential ports on modern integrated chipsets. The output ports have equal amplitude (-3dB) with 180 degree phase differential. The BD2425N5075AHF is available on tape and reel for pick and place high volume manufacturing.

Detailed Electrical Specifications: Specifications subject to change without notice.

Features:		ROOM (25°C)			
• 2400 – 2500 MHz	Parameter	Min.	Тур.	Мах	Unit
0.56mm Height Profile	Frequency	2400		2500	MHz
 50 Ohm to 2 x 37.5 Ohm Low Insertion Loss 	Unbalanced Port Impedance		50		Ω
• 802.11 b+g	Balanced Port Impedance		75		Ω
• MIMO b+g	Return Loss	14	18		dB
Bluetooth	Insertion Loss*		0.7	0.9	dB
Zigbee	Amplitude Balance		0.3	0.9	dB
Surface Mountable	Phase Balance		1	3	Degrees
 Tape & Reel Non-conductive surface RoHS Compliant Halogen-Free 	CMRR		35	Ũ	dB
	Power Handling			1	Watts
	Operating Temperature	-55		+85	°C

Insertion Loss stated at room temperature (Insertion Loss is approximately 0.1 dB higher at +85 °C)

Outline Drawing

Typical Performance:2300 MHz. to 2600 MHz.

USA/Canada: Toll Free: Europe: (315) 432-8909 (800) 411-6596 +44 2392-232392

Available on Tape and Reel for Pick and Place Manufacturing.

Model BD2425N5075AHF

Wide Band Performance: 500 MHz. to 8500 MHz.

Available on Tape and Reel for Pick and Place Manufacturing. USA/Canada: Toll Free: Europe:

(315) 432-8909 (800) 411-6596 +44 2392-232392

Mounting Configuration:

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

All of the Xinger components are constructed from ceramic filled PTFE composites which possess excellent electrical and mechanical stability having X and Y thermal coefficient of expansion (CTE) of 17 ppm/°C.

An example of the PCB footprint used in the testing of these parts is shown below. An example of a DC-biased footprint is also shown below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances.

USA/Canada: Toll Free: Europe:

Available on Tape and Reel for Pick and Place Manufacturing.

Packaging and Ordering Information

Parts are available in reel and are packaged per EIA 481-2. Parts are oriented in tape and reel as shown below. Minimum order quantities are 4000 per reel. See Model Numbers below for further ordering information.
