

Specification

Part No.	:	FMA359.A.LBFCG.001
Product Name	:	Steedan 5-in-1 Magnetic Mount Antenna with GNSS, LTE & FirstNet, 2*Wi-Fi
Features :		Low Profile Magnetic Mount Enclosure
		1*LTE 698-960MHz / 1710-2170MHz / 2490-2690MHz /
		3300-3600MHz
		1*FirstNet Band 14
		2* Wi-Fi MIMO 2.4GHz/5.8GHz
		1* GPS-GLONASS-GALILEO-BeiDou Antenna
		IP67 Rated, Ruggedized PC/ABS Enclosure
		LTE & FirstNet: 3M TGC200 Cable and SMA(M)ST Connector
		Wi-Fi: 3M TGC200 Cable and RP SMA(M)ST Connector
		GNSS: 3M RG-174 Cable and SMA(M)ST Connector
		Dimensions: 247 * 144.3 * 47.8 mm
		RoHS Compliant

SPE-18-8-104/A/AW Page 1 of 70

1.Introduction

The Taoglas Steedan Scout FMA359 is a 5-in-1 next-generation low profile magnetic mount antenna for vehicle, outdoor building and heavy equipment roof applications. It has a fully IP67 rated waterproof robust ABS enclosure and base. This is an ideal external combination antenna solution that is used where drilling a hole through the roof of a vehicle or a metal panel is not feasible. It can be mounted on steel surfaces and its ultrastrong neodymium magnets. A soft foam cushion on the base protects the mounting surface during installation and removal. Only 48mm high it mounts discretely to the target application out of sight of most onlookers.

This outstanding antenna delivers powerful antenna technology for LTE (2G/3G/4G) and Wi-Fi 2.4/5.8GHz and a custom tuned GPS/GLONASS/BeiDou patch antenna for GNSS location services. The 5 internal antennas have superior isolation. The LTE antenna also includes backward compatibility to work at most worldwide 3G and 2G bands.

This antenna has been optimized for use in FirstNet Applications. FirstNet is a dedicated communications tool for First Responders in the US. It is an isolated network to provide faster critical information and data-sharing between First Responders and their agencies.

Typical Applications:

- Next Generation OEM Automotive Connectivity
- Multimedia, Navigation and Telematics Systems
- V2V, V2X and Fleet Management Applications
- Real-time HD Video Streaming
- Digital Signage and Remote Monitoring
- FirstNet Responder Routers

FirstNet is a dedicated communications tool for First Responders in the US. It is an isolated network to provide faster critical information and data-sharing between First Responders and their agencies. New FirstNet devices are being deployed to allow for the multitude of services and applications which will be using the network for the following mission critical applications:

- Computer-aided dispatch (vehicle location)
- EMS Electronic Patient Care Reporting
- Vehicle Mounted RMS/ Citations/ Scanners

SPE-18-8-104/A/AW Page 2 of 70

- Video Streaming

The Steedan is ideal for applications that require highly sophisticated antennas for realtime streaming applications that demand high-speed video uplink and downlink into the cabin of the vehicle. These challenges are resolved by the highly efficient, high gain MIMO antennas, with high isolation, all of which is necessary to achieve the required signal to noise ratio and throughput.

The Steedan can also be customized for your particular wireless application and frequency band, subject to NRE and MOQ. There are 5x 3000mm low loss TGC-200 cables, terminating in SMA(M) connectors for LTE & FirstNet, and RP-SMA(M) for Wi-Fi MIMO. There is a 3000mm RG-174 cable for GNSS terminating in an SMA(M) connector. All cable lengths and connector types are customizable. Contact your regional Taoglas sales office for support.
