1. INTRODUCTION

This specification describes about manual slide type magnetic card reader, featuring small size, light weight and high performance which enable to read card data encoded by following ISO1,2 standards.

- 2. PRODUCT NAME
- 2. 1 Product Name : Manual slide type magnetic card reader
- 2. 2 Model No.

1 2 3 4 5 6 7 8 9 10 ZU-M1242 🗆 1 Magnetic head specification(S:standard) (L:Long life)

:

3	•	F	U	Ν	С	Т	I	0	Ν
---	---	---	---	---	---	---	---	---	---

ŧ

- 3. 1 Card operation :One way (Refer to appearance) 3. 2 Read/Write
- :Read only

4. EQUIPMENT SPECIFICATION . ~ · · ·

4. 1 Out dimension 4. 2 Weight	:90mm(L) × 25mm(W) × 24mm(H) :Approximately 28g
4. 3 Supplied voltage	
 (1) Supplied voltage (2) Current consumption (3) Maximum applied vol 4. 4 Connector 4. 5 Environment require 	tage :+7VDC :Molex-Japan Co. Itd 53261-0990(Defer to 7.5)

.

5. BASIC FEATURES 5. 1 Card operating speed : $10 \sim 150$ cm/sec 5. 2 Magnetic head (1) Numbers of channel : 2 (2) Core width : 1.4mm (3) Core material : Permalloy(S:Standard)

□ Sendust (L:Long life)

6. CARD STANDARD

6. 1 Card standard

Card Standard	ISO			
	Track 1st	Track 2nd		
Recording density Recording capacity	210 BPI 79Characters	75BPI 40Characters		
Recording method	(7bit code) FM	(5bit code) FM		

Track 1st···I S O 1 (IATA) : International Air Transport AssociationTrack 2nd···I S O 2 (ABA) : American Bankers Association Standard

6. 2 Location of tracks

I S O (2 Tracks) ISO 7810, ISO 7811

Coercive force(Hc): 300~3000(0e)

7. CIRCUIT CONSTRUCTION

7.1 Block diagram

Fig 7.1 Block diagram

7. 2 Interface requirement

- (1) Signal Level : CMOS level
- (2) Signal Logic : Low active
- (3) Connection condition

(4) Output voltage

Table 7.2 Output voltage

	Min(V)	Max(V)	Conditions
H level "O"	4.0	Vcc	I _{он} = -1.0mA
L level "1"	-	0.4	IoL = 4.0mA

7. 3 Explanation of input/output signal

ı

Input/output signals are $\overline{\text{CLD}}$, $\overline{\text{RCL}}$, $\overline{\text{RDT}}$, SGND, FGND and effective operation Mode for each of these signals shall be "L" level for all.

- 7. 5 Terminal No. of connector
 - (1) Maker : Molex-Japan Co.,Ltd.

(2) Model No. Connector 53261-0990 (Connect for PC. Board) Housing 51021-0900 Terminal 50079-8000

:

(3) Pin No. & Signal Name

.

ZU-M1242 (Card reader side)

Connector Pin No.	Signal Name	
1	FGND	
2	SGND	
3	+5VDC	
4	RDT2	
5	RCL2	
6	CLD2	1
7	RDT1	
8	RCL1	
9	CLD1	

Note) : Make sure to use the connection cable of less than 300mm length for the card reader.

8. ENVIRONMENTAL CHARACTERISTICS

8.	1	Operating Temperature Range	:-20∼60°C
8.	2	Operating Humidity Range	:10~90%RH (No condensation allowed)
8.	3	Storage Temperature Range	:-30∼70°C
8.	4	Storage Humidity Range	:10~95%RH (No condensation allowed) (24 hours)
			standard environment y: 35 to 60%RH).Leave it for 12 hours, ake sure no abnormality is found.
8.	5	Vibration	:Vibration sweep 10~50 Hz/mm X,Y,Z directions
8.	6	Shock durability	:30G
8.	7	Others	:Make sure the source of noise that may deteriorate the characteristics of the card reader is not present around the card reader.

- 9. UNIT LIFE AND RELIABILITY
 - 9. 1 Life Magnetic head : 🗌 300,000 times pass (S:Standard)

 - : 🗌 1,000,000 times pass (L:Long life) . (conditions) In a clean office room.
 - In damp or dirty atmosphere, the life may be 1/3 to 1/5
 - of the above figure.
 - 9.2 Error rate : Less than 0.1%
 - (conditions) This error rate is obtained when a new normal card(data "1010" \cdots)is horizontally passed at the standard speed $(30 \sim 60\,\mathrm{cm}\,/\mathrm{sec.})$ by manual operation in the clean environ -ment at delivery from our company.
- 10. PERIOD OF GUARANTEE As per PIC's policy of warranty.
- 11. MAINTENANCE

Because of difficulty at changing components on the P.C Board, replace of whole unit is recommended for service and maintenance.

12. HANDLING PRECAUTIONS

- 12.1 Mounting method
 - Mount on a flat surface, with due care not to apply excessive (1)force on the card reader main body.
 - When mounting on the equipment, take due care so that faces of the (2) constructive device except for the attaching face shall not contact the flexible printed circuit board.
 - (3) The controllability is most stable when installed so that the card may run in the vertical direction.
 - The controllability will be further stabilized when card guide (4) plates are installed before and after the card running part of the card reader.
- 12.2 Handling method
 - Since the reading performance depends on the card inserting (1)direction, insert correctly in the specified direction. The inserting direction is specified in the outline drawing of the specification. If the card is inserted obliquely, the contact of the card and

magnetic head is poor, and it may lead to reading error. When inserting the card, the card hits against the head and the

- (2) action may be dull only for a moment to cause reading error. It must be noted that this phenomenon is likely to occur when the card is inserted slowly.
- As for card running speed, manipulate within specified speed range. (3) It may result in an error if card operation is interrupted or extremely accelerated or decelerated. A stable card handling speed by man is usually 30 to 60 cm/sec.

- 12.3 Cautions
 - (1) Use specified card.(ISO) Use the card with the coercive force of $300 \sim 3000$ 0e for ISO.
 - (2) Store the card carefully so as not to soil, injure or deform it. In particular, deposit of solid matter on the magnetic stripe surface may result in a trouble.
 - (3) To prevent wear of the magnetic head, clean the head by periodically passing a cleaning card.
 For example, in a clean office room, pass the cleaning card about once a week. If the magnetic head is heavily stained, clean the head by soaking the felt part of the cleaning card in alcohol properly.
 (4) When installing the card pender small during head by contained.
 - (4) When installing the card reader, avoid dusty, hot or damp place, or near magnetic field or object generating inductive noise (printer, LED display unit, CRT, etc.).

Do not use in a place exposed to direct sunlight.

- (5) When storing, pay attention to dust, heat, humidity and other environmental conditions.
- (6) Do not touch the printed circuit board with bare hand. Note particularly static electricity.
- (7) Do not touch the flexible printed circuit board with hands.
- (8) Do not supply power from other outlet than connector.
 Pay special attention to the polarity of power source and wrong connection of connector.
- (9) Check the noise, static electricity, etc., with the card reader being incorporated in the equipment.
