## Item description

The PFC200 Controller is a compact PLC for the modular WAGO I/O System. Besides network and fieldbus interfaces, the controller supports all digital, analog and specialty modules found within the 750/753 Series.

Subject to changes. Please also observe the further product documentation!

Two ETHERNET interfaces and an integrated switch enable line topology wiring.

An integrated Webserver provides user configuration options, while displaying PFC200 status information.

Besides the processing industry and building automation, typical applications for the PFC200 include standard machinery and equipment control (e.g., packaging, bottling and manufacturing systems, as well as textile, metal and wood processing machines).

Programming per IEC 61131-3

- Programmable via WAGO-I/O-PRO V2.3
- Direct connection of WAGO's I/O modules
- 2 x ETHERNET (configurable), RS-232/485, CAN, CANopen, PROFIBUS DP Slave
- Linux operating system with RT-Preempt patch
- Configuration via CODESYS or Web-Based Management interface
- Maintenance-free

The device is ideal for operation in extreme environments thanks to:

- An extended temperature range
- Greater immunity to impulse voltages and electromagnetic interference
- Higher vibration and shock resistance

## Libraries

### WAGOAppRTU\_Slaves Library

WAGOAppRTU_Slaves Library Library for the IEC-60870 connection of customer systems in the German electricity network area of the network operators E.ON, Westnetz, EWE and Netz BW; the number and power of the generating plants (EZA) is increasing. In order to ensure network stability, distribution system operators require that customer facilities become controllable and switchable. This means considerable programming effort for corresponding interfaces in the network connection point (NAP). For system integrators who use WAGO telecontrol technology, however, this work is not necessary, because with the library WAGOAppRTU_Slaves they can use ready-made communication libraries - as a free download for the network areas of the E.ON and EWE, networks BW and for Westnetz.	1.9.0.0 2023 Jan 18	ZIP 2.1 MB	<a href="#">Download</a>

### WAGO Telecontrol Configurator

WAGO Telecontrol Configurator	1.2.31.0	ZIP	Download
The WAGO Telecontrol Configurator is an stand-alone software for easy configuration and commissioning of WAGO controllers for telecontrol technology.	2021 Dec 16	111.2 MB	

Without the help of additional software, this configurator can be used alone to configure communication between WAGO-I/O-SYSTEM controllers and a DNP3 and IEC 60870-5-101/104 control system. Data from digital and analog input modules, as well as the 3-phase power measurement modules can be sent to the control system. The control system can send commands and setpoints to the digital and analog output modules. The telecontrol configurator cannot further process the data in the decentralized controller. WAGO provides the e!COCKPIT automation software for programming a decentralized automation task. The telecontrol configurators for DNP3 and IEC 60870-5-101/104 are integrated in the same way in e!COCKPIT.

### GitHub: Linux® Toolchain

GitHub: Linux® Software Development Kit (SDK)		URL	Download
With the PFC SDK, WAGO offers Linux® enthusiasts the opportunity to compile the PFC firmware themselves, and to expand it according to their own wishes.			

The WAGO PFC SDK includes a Pengutronix build environment, optimized for the PFC, and the OSELAS Toolchain, which open up the following possibilities, among others:

- Expanding the firmware functions using open source packages like: Python, SQLite3, PHP, etc.
- Compiling their own C/C++ applications with direct or indirect bus access to the local bus, CANopen, or PROFIBUS.
- Compiling external libraries using CODESYS V2 to expand the PLC applications.

Subject to changes. Please also observe the further product documentation!

- There are detailed instructions for many of these tasks and ideas (see WAGO GitHub HowTo's).
