PN Silicon Photodiode

OP900SL

Features:

- Narrow receiving angle
- Enhanced temperature range
- Ideal for direct mounting to PCBoard
- Fast switching speed
- Linear response vs. irradiance
- Mechanically and spectrally matched to OP123 emitters

Description:

Each **OP900SL** consists of a PN junction silicon photodiode mounted in a miniature glass-lensed hermetically sealed "pill" package. The lensing effect allows an acceptance half-angle of 18°, when measured from the optical axis to the half-power point.

The OP900SL is mechanically and spectrally matched to the OP123 series emitters.

<u>Please refer to Application Bulletins 208 and 210 for additional design information and reliability (degradation) data, and to</u> <u>Application Bulletin 202 for pill-type soldering to PCBoard.</u>

Applications:

- Non-contact reflective object sensor
- Assembly line automation
